EDMONTON, March 3, 1919.

To His Honour

ROBERT GEORGE BRETT,

Lieutenant Governor of the Province of Alberta.

May It Please Your Honour :—The undersigned has the honour to submit herewith the Report of the Department of Public Works for the year ending December 31st, 1918.

Respectfully submitted,

A. J. MCLEAN,

Minister of Public Works.

REPORT

OF THE

DEPUTY MINISTER OF PUBLIC WORKS

HON. A. J. McLEAN,

Minister of Public Works.

SIR,—I have the honour to submit herewith the Report of the Department of Public Works for the year 1918.

The conditions under which work of any kind could be carried on during the past year have been most adverse, owing to the serious shortage and high price of material and labour. These adverse conditions have been commented upon each year during the existence of the war, and each succeeding year has seen the difficulties further increased. In view of these conditions, every possible endeavor has been made to avoid expenditure not absolutely required and to observe strict economy in those works which it was imperative that we should carry on.

HIGHWAYS.

The construction and maintenance of highways, including bridges and ferries, is work which must continue, and the largest expenditure was of course made in this branch of the department.

Only a comparatively small amount of new work was undertaken, and the chief effort was towards proper maintenance of what had already been constructed, this being the best policy from both standpoints of economy and service to the public.

The programme in bridge construction was light and was confined to timber structures.

Three new ferries were established, and the usual free ferry service continued throughout the year, and in fact, to a very late date, owing to the mild weather.

The report of the Engineer of Highways gives full details of the work carried on in connection with roads, bridges and ferries.

SURVEYS.

Closely connected with the work of the Highways Branch is that of the Surveys Branch of the Department. The rectangular system of subdivision adopted in the original surveys of the lands of the province, while admirable in many ways, is not so applicable to this portion of the western plains, which adjoins the mountains, as it is to the more purely prairie Provinces of Saskatchewan and Manitoba, for the reason that the road allowances are so frequently blocked by

natural obstacles. The demand for the location, survey and establishment of diversions from the original road allowances is accordingly very heavy.

The report of the Assistant Director of Surveys shows that though the period of field work was shorter than usual, the season was favorable and an exceptionally large amount of work was done. In spite of this fact there were many requests which could not be dealt with, and had to be carried over to next season. Detailed reports from the various surveyors show just what work was done.

DRAINAGE.

Work under The Alberta Drainage Act will soon be well under way in Drainage District No. 1, south of Holden. The contract for this work was let in August last, and machinery was on the ground and work commenced before freeze up. The coming summer should see this ditch well under way.

In Drainage District No. 6, near Viking, a smaller scheme than No. 1, contract has also been let and work should proceed in the spring, while in a number of other districts matters are reaching the stage where the works can be proceeded with if desired. The report of the Drainage Engineer gives full particulars.

MINES.

The Mines Branch report shows that there was a large output during the year 1918, that of the previous year being exceeded by over one million tons. A considerably larger amount of coal was shipped into the Provinces of Manitoba and Saskatchewan from Alberta than ever before, but there is doubtless a considerable quantity of coal being imported into Western Canada.

A gratifying feature in connection with the increased output is the fact that the number of fatal accidents was less than during 1917, the figures for the year being 22 fatal and 137 non-fatal accidents.

A new Mine Rescue Station was installed at Mountain Park and work in connection with these stations all over the province has been carried on in a satisfactory way.

Full details of this branch of the work will be found in the report of the Chief Inspector of Mines, which is also accompanied by a number of interesting tables giving statistics in regard to coal production and consumption.

BUILDING.

In the Architectural Branch the work undertaken was considerably in excess of that performed during any year since 1914.

A building to accommodate seventy-five male patients, and to be used as a sick and chronic ward, is being added to the hospital for the insane at Ponoka, and is now well under way towards completion. Work on this building was seriously delayed by the influenza epidemic.

A building to be used for legal offices was erected at Taber during the year, and is now occupied giving accommodation also to the Provincial Police at that point.

In addition to this new construction there was increased demand for architectural service from other departments of the Government in connection with rural schools, municipal hospitals, etc., as well as increased work in the maintenance of all provincial buildings, which is of course, constantly growing, as the number of such buildings increases.

The report of the Provincial Architect gives details of the work which was carried out.

STEAM BOILERS.

In the Steam Boilers Branch, the report of the chief inspector shows that in spite of the fact that as a result of the crop shortage at least thirty per cent. of the agricultural boilers were not in service, and consequently not available for inspection, and that the work in the fall was also much hampered by widespread quarantine regulations, nevertheless a good average year's work was accomplished.

The new Boilers Act, which was passed at the 1917 Session of the Legislature, has proved very satisfactory in operation, and I am pleased to be able to say that the past year has been remarkably free from accidents of any kind in connection with the operation of boilers. Alberta still has a clean sheet, with no fatal accidents of this nature to record.

PUBLIC INSTITUTIONS.

The reports from the Wardens of the gaols at Lethbridge and Fort Saskatchewan are most satisfactory, the returns from the gaol farms in an adverse year being very gratifying.

The report of the Hospital for the Insane at Ponoka shows most satisfactory operation, as does also the report of the Superintendent of the Hospital for Returned Soldiers at Red Deer, opened during the year.

ACCOUNTANT'S AND CORRESPONDENCE BRANCHES.

The reports of the Accountant's Branch and Correspondence Branch show increased work over 1917.

Brief mention has been made of the effect of the influenza epidemic on our work, and I desire here to draw attention to the splendid services rendered by many members of our staff during this outbreak in assisting and nursing the sick. Special mention in this connection should be made of the work of our general road foremen. These men, with the knowledge they possessed of their various districts, were of particular value in patrolling outlying territory and seeing that no one was lying sick and uncared for. Their self-sacrificing devotion to duty, when called upon for this work, is worthy of praise.

Serious outbreaks occurred at the Hospital for the Insane at Ponoka and at the Hospital for Returned Soldiers at Red Deer. At

the former institution especially the attack was virulent and the untiring efforts of the officials in charge of these institutions during this trying experience merit high commendation.

The happy termination of the war towards the close of the year promises the return of many of our employees safe and sound, to take up their old employment with us. Some have already returned, bearing honorable wounds, and are back at work. Some will never return to us, but they are not forgotten.

The following is our Roll of Honour :

Allan, Adam.	Lunn, H. A.
Armstrong, R.	Markes, A. E.
Balrd, Harry.	McGee, W.
Batters, G. S. (killed in action).	McKay, Hugh (wounded and discharged).
Blakey, R. P. (discharged and returned to the service).	McLean, N. (discharged and returned to the service).
Brown, P. McL.	McNicol, D. J. (wounded)
Calder, H. J.	Munro, W.
Cawsey, J. S.	Napper, T.
Coulson, R.	Pierce, J. S.
Craig, Tom.	Richardson, J.
Cross, Geo.	Robertson, E. D.
Dowe, W.	Ross, H. O. (killed in action).
Duncan, W.	Ross, J.
Duggan, John	Seward, A. E.
Fago, Joseph.	Solway, W. C.
Fraser, James	Stewart, A. G.
Garvin, C. O.	Todd, R.
Girvan, J.	Turton, W. H. (wounded, discharged and returned to the service).
Gray, Thomas.	Urquhart, D.
Hollingsworth, E.	Watson, James.
Jones, Caleb.	Williams, G.
Jones, J. E.	Winter, J.
Kinsman, J. (discharged and returned to the service).	Woods, S. B.
Laidlaw, James.	
Leighton, A. F.	

Respectfully submitted,

L. C. CHARLESWORTH,

Deputy Minister.

HIGHWAYS BRANCH

EDMONTON, February 17, 1919.

L. C. CHARLESWORTH, ESQ.,
Deputy Minister of Public Works,
Edmonton.

SIR,—I have the honour to submit herewith the report of the work performed by the Highways Branch of the Department of Public Works during the year ending December 31st, 1918.

The number of bridges dealt with during the year was 354; of these 185 were construction and 169 repairs. The following are a few of the larger structures completed and opened for traffic during the year.

Over the Beaver Lodge river, near Halcourt, one 60 foot timber truss and two 20 foot spans were constructed on pile substructure.

Over the Belly river at Standoff an old 90 foot steel span, which had been washed out, was salvaged and reconstructed on pile substructure, together with two 24 foot approaches.

Over the Bow river, south of Cluny, three 135 foot timber trusses and three 22 foot spans were constructed on pile substructure.

Over Bigstone Creek, north from Wetaskiwin, one 50 foot timber truss was constructed on concrete abutments.

Over Burnt river, east from Spirit river, one 60 foot timber truss and four 18 foot spans were constructed on pile substructure.

Over the Clearwater river, west from Raven, two 125 foot timber trusses and two 20 foot spans were constructed on pile substructure.

Over Knee Hill Creek, north-east from Acme, an 80 foot timber truss was constructed on pile substructure.

Over the Little Red Deer river, west of Innisfail, one 125 foot timber truss and two 20 foot spans were constructed on pile substructure.

Over the Little Red Deer river at Bituma, one 90 foot timber truss and two 16 foot spans were constructed on pile substructure.

Over the Medicine river near Eckville, one 80 foot timber truss and two 16 foot spans were constructed on pile substructure.

Over the Milk river at Ashes Crossing, one 125 foot timber truss was constructed on pile substructure.

Over the Oldman river at Maunsel, two 110 foot timber trusses were constructed on pile substructure.

Over the Oldman river at Brocket, two 125 foot timber trusses were constructed on pile substructure.

Over the Red Deer river, north from Duchess, five 100 foot timber trusses were constructed on pile substructure.

Over the Red Willow near Halcourt, one 135 foot timber truss and two 25 foot spans were constructed on pile substructure.

Over the Rosebud river at Rosedale, an old 100 foot steel span, purchased from the City of Calgary, was erected on pile substructure.

There was also a foot bridge, 350 feet in length, constructed over the James river near Lobley.

With reference to the construction and maintenance of roads, there was very little new work undertaken. An effort was made, however, to keep in good state of repair the roads already constructed. Our greatest difficulty during the season was in obtaining labour for this class of work.

The total number of ferries operated by the Government during the year was 70. In addition to these, there were 6 ferries located at points where the traffic was so light that it did not warrant the employment of an operator. These ferries were maintained by the Department, so that the people could operate them for their own convenience.

A full list of all the work undertaken by the Highways Branch appended hereto.

Your obedient servant,

J. D. ROBERTSON,

Engineer of Highways.

BRIDGES CONSTRUCTED OR RE-CONSTRUCTED IN 1918.

STREAM	LOCATION	SIZE AND CLASS OF BRIDGE
Andrews Creek -----	Tp 78-13-5 -----	Log bridge.
Bow River -----	Tp. 20-20/21-4 -----	Three 135 ft. and three 22 ft. timber trusses.
Blackmud Creek -----	W. 36-50-25-4 -----	Three 20 ft. spans on piles.
Blindman River -----	N. 35-39-1-5 -----	One 80 ft. truss, two 20 ft. approaches.
Bear Creek -----	Bet. 12/13-1-10-4 -----	One 12 ft. frame bent.
Breed Creek -----	Bet. 27/28-1-10-4 -----	Two 20 ft. pile spans.
Breed Creek -----	Sec. 9-1-10-4 -----	Two 20 ft. pile spans.
Belly River -----	At Standoff -----	One 90 ft. steel span, two 24 ft. timber spans.
Bearberry Creek -----	Bet. 17/18-33-6-5 -----	Four 20 ft. pile spans.
Beaver Lodge River -----	Sec. 7-71-9-6 -----	One 60 ft. timber truss, two 20 ft. approaches
Burnt River -----	N.W. 11-78-4-6 -----	One 60 ft. timber truss, four 18 ft approaches.
Beaver Creek -----	Sec. 3-6-2-5 -----	Two 16 ft pile spans.
Battle River -----	Bet. 21/22-45-28-4 -----	One 16 ft. pile span, one 20 ft. pile span.
Bigstone Creek -----	Sec. 2-47-24-4 -----	One 50 ft. truss on concrete abutment.
Creek -----	Bet. 12/13-25-9-4 -----	One 12 ft. mud sills.
Creek -----	Bet. 13/14-25-9-4 -----	One 12 ft. mud sills.
Creek -----	Bet. 35/36-24-9-4 -----	One 12 ft. mud sills.
Creek -----	S.E. 34-67-24-4 -----	One 16 ft. span on piles.
Creek -----	Bet. 34/35-67-22-4 -----	Two 18 ft. spans on piles
Crowfoot Creek -----	Bet. 5/31, 21/22-20-4 -----	Four 20 ft. spans on piles.
Creek -----	Bet. 31/32-21-21-4 -----	One 16 ft. span on piles.
Creek -----	N. of N.E. 31-24-20-4 -----	One 18 ft. span on piles.
Creek -----	N. of N.W. 31-24-20-4 -----	One 18 ft. span on piles.
Creek -----	Bet. 26/35-70-11-6 -----	Four 18 ft. and two 16 ft. spans on piles.
Creek -----	Sec 36-26-1-5 -----	Four 20 ft. spans on piles.
Creek -----	Sec. 9-27-1-5 -----	One 20 ft. frame bent.
Creek -----	Bet. 10/15-1-24-4 -----	One 18 ft. span on piles.
Creek -----	Sec 28-49-20-4 -----	One 18 ft. span on piles.
Creek -----	R L 15-46-21-4 -----	One 14 ft. frame bent.
Creek -----	W. of 4-47-21-4 -----	One 10 ft. mud sills.

Road east of 18 and 19-5-14-4.
Road north of 31-4-15-4.
Road north of Tp. 4-15-4.
Road Yeoford to Buck Lake.
Road from Battle River to N.E. corner 35-46-3-4.
Road south of Kitscoty.
Road south of Blackfoot.

FERRIES, 1918

The total number of Ferries operated by this Department in 1918 was 70.

There were a few ferries located at points where the traffic was so light that it did not warrant the employment of an operator. These ferries were maintained by the Department so that the people could operate them for their own convenience.

These were as follows:

Over Old Man River north of Purple Springs;
Over Athabasca River on Edson-Grande Prairie Trail;
Over Baptiste River on Edson-Grande Prairie Trail;
Over Little Smoky River on Edson-Grande Prairie Trail.
Over Old Man River north of Grassy Lake;
Over Bow River south of Bassano;

making 76 Government owned ferries in the province.

New ferries were built and installed on the following locations:

Over Athabasca River at Mirror Landing
Over the McLeod River north of Mahaska
Over the Bow River north of Vauxhall.

New scows were built in connection with the following ferries:

Over the North Saskatchewan River at Victoria
Over the North Saskatchewan River at Shandro.
Over the Peace River at Peace River Crossing.
Over the Red Deer River west of Munson.
Over the North Saskatchewan River at Mooswa.
Over the Bow River at Amethyst.
Over the North Saskatchewan River at Elk Point.
Over the Red Deer River west of Morrin.

The following is a complete list of ferries in the province at the close of the season of 1918:

Red Deer River at Prince's Ranch.
North Saskatchewan River at Brosseau.
North Saskatchewan River at Desjarlais.
Athabasca River at Holmes' Crossing.
Bow River south-west of Cluny.
Red Deer River at Dorothy.
North Saskatchewan River at Victoria.
North Saskatchewan River at Fourth Meridian.
Athabasca River at Athabasca.
Tolman Ferry over Red Deer River.
North Saskatchewan River at Shandro.
Pembina River at Wild Horse.
North Saskatchewan River at Hopkin's Crossing
Red Deer River at Fieldholm.
North Saskatchewan River at Rocky Mountain House.
Peace River at Peace River Crossing.
Lac Ste. Anne at the Narrows.
North Saskatchewan north of Kitscoty.
North Saskatchewan north of Lamont
Pembina River at Sunniebend.
Pembina River at Wright's Crossing.
North Saskatchewan River at Lamora's Crossing.
Bow River south of Strathmore.
Peace River at Dunvegan.
South Saskatchewan River at Bow Island.
North Saskatchewan River north of Mannville.
North Saskatchewan River at Fraser Landing
Pembina River at Entwistle.

Red Deer River at Steveville.
Bow Valley at River Bow.
Beaver River at Cold Lake Crossing.
Old Man River north of Purple Springs.
Bow River at Rocky Buttes.
Red Deer River west of Munson.
North Saskatchewan River south of Tomahawk.
Red Deer River at Finigan's Crossing.
Pembina River at Matthew's Crossing.
North Saskatchewan River at Mooswa.
Pembina River at Lunnford.
Athabasca River on Edson Trail.
Baptiste River on Edson Trail.
Belly River at Grassy Lake.
Little Smoky River on Edson Trail.
Bow River at Eyremore.
McLeod River north of Thornton.
McLeod River at Whitecourt.
Red Deer River at Iddesleigh.
Bow River at Amethyst.
Beaver River at Durlingville.
North Saskatchewan River north of Bruderheim.
Pembina River at Manola.
McLeod River north of Peers.
Red Deer River north of Jenner.
Red Deer River at Gregory's Ford.
North Saskatchewan River at Elk Point.
Red Deer River at Emerson's Ford.
Red Deer River at Empress.
Pembina River north of Sangudo.
Red Deer River west of Morrin.
Pembina River west of Eunice.
Athabasca River at Mirror Landing.
McLeod River north of Mahaska.
Red Deer River north of Pancras.
Red Deer River north of Atlee.
North Saskatchewan River at Forbesville.
South Saskatchewan River at Fourth Meridian.
McLeod River north of Rosevear.
Athabasca River at Hinton.
Big Smoky River near the mouth of Wapiti River.
Red Deer River north of Majestic.
Bow River south of Bassano.
Peace River at Vermilion—2 ferries.
Saskatchewan River at Heinsburg.
Red Deer River below Rosedale.
Red Deer River at Niddrie's Crossing.
Bow River north of Vauxhall.

SURVEYS BRANCH

EDMONTON, January 27, 1919.

THE DEPUTY MINISTER,
Department of Public Works,
 Edmonton, Alberta.

SIR,—I have the honour to submit the following report in connection with work in the Surveys Branch for the year 1918.

In pursuance of the urgent demand for surveys from the various Municipal Districts it was necessary to retain the same force in the field as last year, and whilst the actual outdoor season was cut down, there was a considerable amount of work done, comparing very favourably with previous years.

There is still, however, a heavy list of outstanding requests which it has been found necessary to carry forward to the 1919 schedule.

As was anticipated very few townsite plans have been presented for approval, such of them as have been being mainly of railway townsites and additions thereto.

Progress in connection with the Alberta and British Columbia Boundary survey has been satisfactory.

Appended hereto is a summary showing the work of this branch during the year (which has been exceptionally heavy), also the reports of the district surveyors and engineers.

I have the honour to be, Sir,

Your obedient servant,

A. P. C. BELYEA,
Assistant Director of Surveys.

SUMMARY.

Surveys required and brought forward from 1917	816
Surveys asked for during 1918.....	966
Surveys made during 1918	832
Surveys carried over to 1919 schedule	797
Surveys made without instructions (included in the above figures)....	172
Miscellaneous examinations made during the season.....	129
Surveys cancelled during 1918	24
Plans prepared and filed in the Land Titles Office	619
Certificates of Title received for roads	627
Certificates of Title received for lands given for public purposes under Departmental Regulations regarding subdivisions	13
Certificates of Title of sites for public buildings.....	8
Certificates of Title received for land other than surveyed roads (areas cut off by surveyed roads)	6
Transfers issued covering roads no longer required	181
Number of Plans of subdivision approved during 1918.....	26

LEASE OF ROAD ALLOWANCES.

Number of new applications to lease road allowances-----	174
Number of new applications granted-----	58
Number of leases granted during the year 1918 (including free leases issued as compensation for surveyed roads)-----	227

EXPENDITURE OF SURVEYS BRANCH FOR THE YEAR 1918.

General expenses of surveys-----	\$70,195.55
Alberta and B. C. Boundary survey-----	6,165.40
Compensation for surveyed roads-----	7,495.47
Printing-----	1,261.37
Survey posts-----	2,421.58
Sundries-----	1,306.67
	<hr/>
	\$88,846.04

INCOME OF SURVEYS BRANCH FOR THE YEAR 1918.

Fees received in respect of plans of subdivisions submitted-----	\$2,474.25
Rental from road allowance leases-----	825.25
Sundry fees from sale of maps, diagrams, etc.-----	97.57
	<hr/>
	\$3,397.07

EDMONTON, December 6, 1918.

A. P. C. BELYEA,

Assistant Director of Surveys,

Edmonton.

SIR,—I have the honour to submit herewith a detailed report of the survey work in my district during the year 1918.

My party was organized the first of May and left Edmonton on the third of the month, moving first to Carvel. From there we worked west through Duffield, Keephills, Tomahawk and Entwistle. From Entwistle we moved back to Stony Plain and from there worked south past Telfordville, Conjuring Lake, Pigeon Lake and through the Blindman Valley, and thence north of Gull Lake to Buffalo Lake. During the autumn we completed the surveys in the Meeting Creek and Battle River Valleys and finished up the season around Miquelon Lake and Cooking Lake.

I attach hereto a classified list of the season's work.

Your obedient servant,

MILTON BROWN,

District Surveyor and Engineer.

DIVERSIONS.

Survey No.	File No.	Location.
343-18	24753	Sections 17, 18 and 20, Tp. 39-21-4.

EDMONTON, December 24, 1918.

A. P. C. BELYEA,

Assistant Director of Surveys,

Edmonton, Alberta.

SIR,—I have the honour to submit the following report in connection with survey work in the district north and east of Edmonton during the season of 1918.

I organized my party in Edmonton and commenced field work in St. Albert Settlement on May 1st. I then moved in an easterly and northerly direction as far as Saddle Lake Indian Reserve. Then returning westerly through Smoky Lake and Radway Centre. I crossed the A. & G.W. Ry. at Thorhild, the C.N. Ry. at Clyde and the E. D. & B. C. Ry. at Westlock. After working westerly as far as Range 3, west of the Fifth Meridian, I returned by way of Westlock and Clyde and proceeded northerly to Athabasca.

On September 10th I commenced a re-survey of the old Athabasca Edmonton trail. I completed this work from Athabasca to the northerly boundary of Sec. 12, Tp. 61, 24-4.

I reached Edmonton and disbanded my party on November 7th.

Although the weather was fairly suitable for survey work, some difficulty was experienced in obtaining suitable help.

Attached hereto is a detailed list of the work done, and classified as New Roads, Road Diversions, Examinations, Changes in Existing Surveys, Miscellaneous Surveys and Re-surveys.

Sketch plans and reports were submitted as the season advanced. The final returns and plans are now being prepared.

Your obedient servant,

HOMER P. KEITH,

District Surveyor and Engineer.

NEW ROADS.

--------	-------	----------------------------------------------------------------------------------------

EDMONTON, December 12, 1918.

A. P. C. BELYEA,

Assistant Director of Surveys,

Edmonton, Alberta.

SIR,—I have the honour to submit the following report in connection with survey work in the district north and east of Edmonton during the season 1918.

I organized my party during the first week of May and moved easterly through Clover Bar and thence to the district north of the Canadian Northern Railway. Considerable work was done in the vicinity of Desjarlais and Shalka and also around Plain Lake. All outstanding work south of the Saskatchewan River in ranges 6 to 15 inclusive north of township 47, and in ranges 16 to 24 inclusive north of township 52 was completed with the exception of a few surveys asked for in the latter part of the season.

I disbanded my party on the 26th of November.

The past season was an excellent one for survey work, the roads owing to dry weather being in first class condition.

Attached is a list of work done, classified as Diversions, New Roads, Changes in Existing Roads, Miscellaneous and Examinations.

Your obedient servant,

HARRY S. DAY,

District Surveyor and Engineer.

MISCELLANEOUS

262-18	14067-1	Between Secs. 1 and 2, Tp. 51-11-4.
70-18	23284	Check on existing survey in E. $\frac{1}{2}$ Sec. 8, Tp. 55-11-4.

CALGARY, December 16, 1918.

A. P. C. BELYEA,
Assistant Director of Surveys,
 Edmonton, Alberta.

SIR,—I have the honour to submit the following general report showing the different surveys made in the district of Medicine Hat during the season of 1918

I organized my party at Youngstown on May 3rd, and on the weather clearing I moved south of the Red Deer River and began work. Nearly the whole season was spent making surveys in the Redcliff and Medicine Hat districts.

The season was a dry one and exceedingly favourable for work.

The last work was done on November 20th and the party disbanded the next day.

Following is a list of the surveys made.

Your obedient servant,

GEORGE McMILLAN,
District Surveyor and Engineer.

NEW ROADS.

Survey No.	File No.	Location.
441-15	22458	Secs. 7 and 17, Tp. 9-8-4.
656-16	23638	S.W. $\frac{1}{4}$ 6, Tp. 7-7-4, and N.W. $\frac{1}{4}$ 31, Tp. 6-7-4.
724-16	16143-B	Secs. 35 and 26, Tp. 11-3-4
177-17	23876	Secs. 15 and 22, 16 and 21 and 20, Tp. 22-2-4.
231-17	18819	N. $\frac{1}{2}$ 32, Tp. 12-1-4.
277-17	22803	Secs. 35 and 36, Tp. 18-10-4
588-17	24203	Secs. 4 and 9, Tp. 1-2-4
217-18	24653	N.E. $\frac{1}{4}$ 31 and N.W. $\frac{1}{4}$ 32, Tp. 7-6-4.
240-18	24676	Secs. 7 and 8, Tp. 16-3-4.
256-18	22933	Secs. 27 and 34, 28 and 33, 29 and 32, 30 and 31, Sec. 26, Tp. 22-1-4, also Secs. 36 and 25, Tp. 22-2-4.
277-18	24682	N.W. $\frac{1}{4}$ 23 and N. $\frac{1}{2}$ 26, Tp. 14-6-4.
336-18	24757	Secs. 3 and 4, Tp. 22-3-4.
349-18	24764	Secs. 23 and 26, 22 and 27, Tp. 5-6-4.
456-18	24772	Secs. 1 and 12, 2 and 11, 3 and 10, 4 and 9 and 5, Tp. 14-7-4.
522-18	24946	Sec. 8, Tp. 22-14-4.
531-18	24954	Secs. 3 and 10, 4 and 9, Tp. 18-7-4.
646-18	25160	Secs. 14, 15 and 22, 16 and 21, 17 and 20, 18 and 19, Tp. 17-7-4, and Secs. 13 and 24 and 14 and 23, Tp. 17-8-4.
647-18	25142	Sec. 31, Tp. 16-6-4.
669-18	21686	Secs. 16 and 9, Tp. 14-3-4.
672-18	25164	S.W. $\frac{1}{4}$ 18, Tp. 13-6-4.
685-18	25178	E. $\frac{1}{2}$ 11, Tp. 21-8-4.
686-18	25179	Sec. 31, Tp. 21-7-4, and Sec. 36, Tp. 21-8-4.

Survey No.	File No.	Location.
702-18	25187	Sec. 6, Tp. 14-7-4.
715-18	25211	Secs. 7 and 8, Tp. 13-3-4.
716-18	25212	Sec. 24, Tp. 22-3-4.
722-18	25203	Secs. 6, 7, 8, 17, 16, 21, 22, 27, 34, 35, Tp. 2-1-4, and Secs. 2, 1, 12, Tp. 3-1-4.
729-18	25243	Secs. 8, 5, 4, Tp. 7-3-4, and Secs. 34 and 35, Tp. 6-3-4.
770-18	25192	Secs. 18, 17, 16, 15, 22 and 23, Tp. 13-11-4.
845-18	25315	S.E. $\frac{1}{4}$ 15, Tp. 9-1-4.
919-18	25372	Sec. 34, Tp. 22-7-4.
924-18	25382	S.E. $\frac{1}{4}$ 5, Tp. 12-2-4, and N. $\frac{1}{2}$ 32, Tp. 11-2-4.
958-18	25402	W. $\frac{1}{2}$ 27, Tp. 18-10-4.
961-18	25408	N.W. $\frac{1}{4}$ 21, Tp. 17-8-4.
965-18	25413	N. Sec. 29, Tp. 16-10-4.
960-18	25405	Secs. 26, 35 and N.E. $\frac{1}{4}$ 35, Tp. 12-4-4.
956-18	25399	Sec. 30, Tp. 9-7-4.
964-18	24780	Sec. 26, Tp. 22-2-4.

103-18	24556	Secs. 6 and 7, Tp. 22-8-4.

LACOMBE, December 31, 1918.

A. P. C. BELYEA,

Assistant Director of Surveys,

Edmonton, Alberta.

SIR,—I have the honour to submit the following report in connection with the work performed by myself and party in the Lacombe Public Works District during the season of 1918.

The beginning of the year was spent in the office, completing the returns of the previous season's field work.

On May 1st I organized my party, composed of three men, and took the field. We moved toward the east and made a number of surveys in the vicinity of Alix. From here we moved to Stettler, thence south to Big Valley and Rumsey. After completing the surveys in this neighbourhood we pulled across to the west side of the Red Deer river to Trochu, then northward, making surveys at Huxley, Elnora, Lousana and Delburne. From here we moved toward Red Deer, thence west of Lacombe, and made surveys at Eckville and Leslieville for the balance of the season. We completed field work and pulled into headquarters and disbanded on November 15th.

The whole of the season was exceptionally favourable for field work, there was scarcely any rain and the trails were therefore exceedingly good.

The remainder of the year was spent in office work, preparing plans and field notes.

Attached hereto is a schedule showing the work done, and classified as New Roads, Road Diversions, Examinations and Drains.

Your obedient servant,

A. S. STEWART,

District Surveyor and Engineer.

NEW ROADS.

Survey No.	File No.	Location.
533-16	23542	New road between Secs. 3/10-33-20-4.
572-16	14250-F	New road in S. $\frac{1}{2}$ Sec. 11 and S.W. 12-39-24-4.
596-18	14635	New road in Secs. 4/9/10-43-25-4, change.
369-17	24078	New road in centre of Sec. 21-38-22-4.
741-17	20965	New road in Secs. 21/28-38-27-4
743-17	21304	New road through Sec. 17-33-23-4.
802-17	24431	New road in Sec. 4-40-5-5.
21-18	24496	New road along blind south of Sec. 23-39-5-5.
49-18	14165-B	New road in S.E. 33-41-27-4
96-18	21829	New road in Secs. 23/25/35-38-24-4.
128-18	23506	New road in N.E. 17-34-23-4
178-18	16034-B	New road in Sec. 17-39-3-5.
260-18	23378	New road in N.E. 31 and N.W. 32-38-19-4.
334-18	24751	New road in N. $\frac{1}{2}$ Sec. 1-39-3-5.

VEGREVILLE, December 15, 1918.

A. P. C. BELYEA,

Assistant Director of Surveys,

Edmonton, Alberta.

SIR,—I have the honour to submit the following report of the surveys made and other engineering work done in the districts of Vegreville, Sedgewick, Stettler, Acadia, Coronation, Ribstone and Wainwright during the past season.

The first part of the year was spent preparing and completing returns of the previous season's work.

On May 1st I organized my party at Vegreville and worked southerly through the western part of my district to Township 35. I then worked easterly to Range 4. While in the vicinity of Consort I received a request from the Secretary of Rural Municipality No. 272 stating they had some surveys that were urgent, so I took part of my crew and went and made these surveys. I then worked northerly to the Saskatoon branch of the Canadian Pacific Railway and westerly along same to Hardisty, and then north-westerly across country to Viking, and closed up field operations at Vegreville on November 5th.

Owing to the great number of surveys needed in my district I had planned to clean up all the work north of Township 35 during the season and devote next season to the country south of Township 35, but as additional new surveys were required all along my route of work, I was able to carry out only part of the program as I had planned.

Owing to the increased area of new land under cultivation and being fenced, there was a great demand for surveys.

The work of the past season consists of the Surveying of New Roads, Road Diversions, Drains, Examinations, Reports and Cost Estimates.

The following is a list of the various work done:

NEW ROADS.

Survey No.	File No.	Location.
20-16	18446-B	New road in Secs. 1 and 12, Tp. 43-10-4, and in Sec. 6, Tp. 43-9-4.
290-17	23693	New road in Sec. 17, Tp. 44-13-4.
295-17	21610	New road in Secs. 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23 and 24, Tp. 46-12-4.
330-17	24030	New road in Secs. 2, 3, 10 and 11, Tp. 42-11-4.
355-17	20206	New road in Secs. 2 and 11, Tp. 42-10-4, and Secs. 26, 35 36, Tp. 41-10-4.
360-17	21512	New road in Secs. 12, 13, 14, 15 and 16, Tp. 44-9-4, and Secs. 7, 18, 17 and 19, Tp. 44-8-4.
488-17	24174	New road in Sec. 6, Tp. 42-9-4.
589-17	18960-B	New road in Secs. 16 and 21, Tp. 42-10-4.
761-17	24220	New road in Secs. 13, 14, 15, 16, 21, 22, 23 and 24, Tp. 37-10-4.
853-17	24464	New road in Sec. 29, Tp. 29-6-4.
37-18	24516	New road in Secs. 16, 17, 20 and 21, Tp. 40-13-4.
55-18	18324	New road in Sec. 4, Tp. 46-10-4.
73-18	20167	New road in Secs. 29 and 32, Tp. 39-5-4.
74-18	24256	New road in Sec. 1, Tp. 40-5-4.
82-18	22904-B	New road in Sec. 24, Tp. 38-6-4.
84-18	24545	New road in Secs. 1 and 12, Tp. 39-6-4.
85-18	23407-B	New road in Secs. 19 and 20, Tp. 38-5-4.
112-18	24563	New road in Secs. 14 and 23, Tp. 41-10-4.
272-18	24694	New road in Secs. 14, 15, 16, 21, 22 and 23, Tp. 39-13-4.
275-18	24699	New road in Secs. 28 and 33, Tp. 29-5-4.
276-18	24700	New road in Sec. 7, Tp. 38-14-4.
290-18	24706	New road in Secs. 31 and 32, Tp. 45-10-4, and Secs. 5 and 6, Tp. 46-10-4.
292-18	24708	New road in Sec. 4, Tp. 46-10-4.
295-18	23482-B	New road in Secs. 1 and 12, Tp. 46-11-4.
312-18	24732	New road in Sec. 26, Tp. 45-9-4.
327-18	24747	New road in Secs. 15 and 22, Tp. 38-14-4.
529-18	24955	New road in Secs. 4 and 9, Tp. 42-10-4.
532-18	18323-B	New road in Sec. 27, Tp. 45-9-4.
561-18	24972	New road in Secs. 29 and 33, Tp. 42-8-4.
566-18	24970	New road in Sec. 34, Tp. 41-8-4.
570-18	18736-B	New road in Secs. 26, 27, 28, 29, 30, 31, 32, 33, 34 and 35, Tp. 41-9-4.
584-18	15656-E	New road in Secs. 1 and 12, Tp. 41-9-4, and Secs. 3, 4, 5, 6, 7, 8, 9 and 10, Tp. 41-8-4.
607-18	22465	New road in Secs. 6 and 7, Tp. 41-9-4.
933-18	25365	New road across S W. $\frac{1}{4}$ Sec. 1, Tp. 40-13-4.

ROAD DIVERSIONS

249-17	23957	Diversion south of Sec. 1, Tp. 51-11-4.
285-17	23992	Diversion east of Sec. 22, Tp. 44-11-4.
287-17	23994	Diversion south of Sec. 27, Tp. 45-11-4.
311-17	24011	Diversion west of Sec. 32, Tp. 50-12-4.
423-17	24111	Diversion west of Sec. 10, Tp. 41-6-4.
487-17	24173	Diversion west of Sec. 27, Tp. 41-7-4.
706-17	24349	Diversion south of Sec. 4, Tp. 37-10-4.
732-17	24365	Diversion east of Sec. 5, Tp. 51-10-4.
746-17	24385	Diversions south of Secs. 13 and 14, Tp. 41-13-4.
803-17	24434	Diversion south of Sec. 17, Tp. 37-14-4.
804-17	24435	Diversions west of Sec. 21, Tp. 39-13-4.
805-17	24436	Diversions north of Sec. 8, and south of Sec. 18, Tp. 40-14-4.
839-17	24456	Diversion west of Sec. 25, Tp. 36-14-4.
864-17	24467	Diversion west of Sec. 5, Tp. 37-6-4.
12-18	24466	Diversion east of Sec. 27, Tp. 50-10-4.
22-18	24497	Diversions east of Sec. 28 and 33, Tp. 39-13-4.
23-18	24498	Diversion south of Sec. 6, Tp. 40-13-4.
38-18	24515	Diversion east of Sec. 34, and west of Secs. 26 and 35, Tp. 40-14-4.
59-18	24527	Diversions west of Secs. 12 and 13, Tp. 46-13-4.
60-18	24528	Diversion west of Secs. 2 and 11, Tp. 46-13-4.
65-18	24533	Diversion south of Sec. 4, Tp. 46-13-4.

Survey No.	File No.	Location.
67-18	24535	Diversion west of Sec. 4, Tp. 47-13-4.
75-18	24536	Diversion north of Sec. 35, Tp. 39-5-4.
76-18	24537	Diversion east of Sec. 25, Tp. 39-5-4.
77-18	24538	Diversion west of Sec. 4, Tp. 40-5-4.
78-18	24539	Diversion east of Sec. 9, Tp. 40-5-4.
79-18	24541	Diversion into Secs. 10 and 15, Tp. 38-6-4, and Secs 11 and 14, Tp. 38-6-4.
80-18	24542	Diversions into Secs. 3 and 2, Tp. 38-6-4.
81-18	24543	Diversion east of Sec 35, Tp. 38-6-4.
86-18	24544	Diversions south of Secs. 1 and 2, Tp. 39-6-4, and north of Sec 35, Tp. 38-6-4.
123-18	24574	Diversion east of Sec. 16, Tp. 40-5-4.
198-18	24639	Diversion east of Sec. 6, Tp. 47-12-4.
199-18	24640	Diversion east of Secs. 5 and 8, Tp. 47-12-4
200-18	24641	Diversion west of Sec. 15, Tp. 47-12-4
201-18	24642	Diversion north of Sec. 12, Tp. 47-12-4.
202-18	24643	Diversion east of Sec. 13, Tp. 47-13-4.
206-18	23486-B	Diversion west of Sec. 19, Tp. 45-12-4.
326-18	24746	Diversions into Secs. 24 and 25, Tp. 39-14-4, and Sec 30, Tp. 39-13-4.
271-18	24693	Diversion west of Sec 1, Tp. 39-13-4.
273-18	24695	Diversion north of Sec 33, Tp. 36-14-4
274-18	24696	Diversion east of Sec 11, Tp. 37-13-4.
279-18	18864	Diversions north of Sec 7, and west of Sec 17, Tp. 50-12-4.
291-18	24707	Diversion west of Sec. 20, Tp. 45-10-4.
293-18	24709	Diversion west of Sec 18, Tp. 46-11-4, and east of Sec. 13, Tp. 46-12-4.
296-18	24715	Diversion across Sec. 35, Tp. 46-11-4
313-18	24733	Diversions into Secs. 17, 19 and 20, Tp. 45-9-4.
314-18	24734	Diversion west of Sec. 29, Tp. 45-8-4.
322-18	21052-B	Diversion into Secs. 26 and 27, Tp. 38-14-4
323-18	24739	Diversions into Secs. 20 and 29, Tp. 39-14-4.
324-18	24744	Diversions south of Sec. 13, Tp. 39-14-4.
325-18	24745	Diversion west of Sec. 33, Tp. 37-15-4.
327-17	23208	Diversion south of Sec. 13, Tp. 40-11-4.
360-18	24779	Diversion west of Sec. 31, Tp. 46-12-4
361-18	23778	Diversion west of Sec. 1, Tp. 46-11-4.
401-18	24832	Diversions into Secs. 23, 26 and 27, Tp. 46-10-4.
420-18	24830	Diversions into Secs. 11, 12 and 13, Tp. 45-10-4
421-18	24829	Diversion into Secs. 2 and 3, Tp. 45-10-4.
424-18	24848	Diversions into Secs. 1, Tp. 46-11-4, and Sec. 6, Tp. 46-10-4.
425-18	24850	Diversions east of Secs 19 and 30, Tp. 46-11-4.
426-18	24850	Diversion across Sec. 19, Tp. 45-9-4
427-18	24851	Diversions into Secs, 8, 9, 16 and 17, Tp. 45-9-4
429-18	24857	Diversion south of Sec 13, Tp. 45-11-4.
431-18	18855-C	Diversion west of Sec. 21, Tp. 46-11-4
435-18	24883	Diversion into Sec. 16, Tp. 37-9-4.
485-18	22046-B	Diversions into Secs. 8, 9 and 16, Tp. 37-6-4.
520-18	24948	Diversion west of Sec. 33, Tp. 37-6-4.
527-18	23934	Diversions into Secs. 11, 26 and 35, Tp. 36-6-4, and Secs. 34 and 35, Tp. 35-6-4, and Sec. 3, Tp. 36-6-4.
550-18	24959	Diversion north of Sec 20, Tp. 38-11-4.
551-18	24966	Diversion east of Sec 3, Tp. 37-10-4.
552-18	24961	Diversion south of Sec 18, Tp. 37-10-4
553-18	24962	Diversion south of Sec. 29, Tp. 36-11-4.
554-18	24963	Diversions east of Sec. 25, Tp. 37-12-4 and west of Sec 30, Tp. 37-11-4.
555-18	24964	Diversion south of Sec. 26, Tp. 36-12-4.
562-18	24978	Diversion east of Secs. 14 and 23, Tp. 36-8-4.
563-18	24980	Diversion south of Sec. 16, Tp. 36-8-4.
564-18	24981	Diversions into Secs. 10, 11, 14 and 15, Tp. 36-8-4.
557-18	24966	Diversion east of Sec. 21, Tp. 37-12-4.
588-18	25100	Diversion east of Sec. 19, Tp. 36-14-4.
603-18	25109	Diversion north of Secs. 34 and 35, Tp. 40-9-4, and south of Sec. 3, Tp. 41-9-4.
605-18	25104	Diversion east of Sec. 35, Tp. 47-12-4.
609-18	15392-D	Diversion north of Sec. 25, Tp. 47-12-4.
618-18	25123	Diversions into Secs. 10 and 11, Tp. 31-5-4.

Survey No.	File No.	Location.
619-18	25124	Diversion west of Sec. 23, Tp. 31-5-4.
620-18	25125	Diversion north of Sec. 35, Tp. 30-5-4.
625-18	25128	Diversion north of Sec. 7, Tp. 36-7-4.
626-18	25129	Diversion east of Secs. 12 and 13, Tp. 36-8-4, and west of Sec. 6, Tp. 36-7-4.
655-18	25162	Diversion south of Sec. 3, Tp. 37-13-4
666-18	25161	Diversion north of Sec. 8, Tp. 40-12-4.
705-18	25205	Diversion east of Sec. 8, Tp. 42-13-4
706-18	25206	Diversion north of Sec. 21, Tp. 41-13-4.
707-18	25204	Diversion east of Sec. 34, Tp. 40-12-4.
709-18	15819-C	Diversion west of Sec. 16, Tp. 40-12-4.
742-18	25260	Diversion west of Secs. 13 and 24, Tp. 44-10-4.
748-18	25261	Diversion east of Secs. 17 and 20, Tp. 44-11-4.
787-18	25273	Diversion north of Sec. 22, Tp. 36-6-4.
825-18	23413	Diversion east of Sec. 31, Tp. 38-6-4.
826-18	24913	Diversion west of Sec. 8, Tp. 41-6-4.
865-18	15656-B	Diversion south of Sec. 11, Tp. 41-8-4, and west of Sec. 7, Tp. 40-4-4.

CHANGES IN SURVEYS.

528-18	23481	Change in road surveyed in Secs. 25 and 36, Tp. 45-10-4.
818-17	24153	Change in diversion surveyed east of Sec. 17, Tp. 41-6-4.
19-18	23995	Change in diversion surveyed west of Sec. 30, Tp. 46-11-4, and east of Sec. 25, Tp. 46-12-4.
33-18	23249	Change in road surveyed in Sec. 33, Tp. 39-13-4.
83-18	23410-B	Change in diversion surveyed north of Sec. 31, Tp. 39-5-4.
175-18	21521-B	Change in diversion surveyed in Sec. 33, Tp. 47-10-4.
180-18	18203-B	Change in diversion surveyed in Sec. 34, Tp. 40-12-4.
864-18	23440	Change in diversion surveyed north of Secs. 8 and 9, Tp. 44-10-4.

EXAMINATIONS AND REPORTS.

164-16	23256	Examination and report re road in Secs. 2 and 11, Tp. 42-6-4, let survey stand (advised by Councillor).
286-17	23993	Examination and report re survey in Secs. 19 and 20, Tp. 45-11-4, no survey required.
7-18	24031	Examination and report re road in Secs. 7 and 8, Tp. 40-12-4, Councillor advises not required at present.
36-18	24517	Examination and report re road south of Secs. 15 and 16, Tp. 40-13-4, impossible.
66-18	24534	Examination and report re road north of Sec. 7, Tp. 46-13-4, no survey required.
125-18	24562	Examination and report re road east of Secs. 22 and 27, Tp. 40-12-4, no survey required
249-18	14067	Examination and report re railway crossing north of Sec. 20, Tp. 50-10-4.
214-18	24647	Examination and report re road east of Sec. 8, Tp. 35-8-4, no survey required.
556-18	24965	Examination and report re road south of Sec. 3, Tp. 36-11-4, advise cut hill.
659-18	24968	Examination and report re southwest corner of Sec. 16, Tp. 36-12-4, better grade slough.
565-18	24979	Examination and report re road north of Secs. 15 and 16, Tp. 36-7-4, no survey required.
604-18	25108	Examination and report re road north of Sec. 32, Tp. 40-9-4, not feasible. Party will agree on private road, no survey required.
624-18	25127	Examination and report re road south of Secs. 5 and 6, Tp. 36-7-4, impossible to open.
59-18	24527	Examination and report re drain across Sec. 15, Tp. 46-13-4
		Examination and report re drain east of Sec. 15, Tp. 41-13-4.

OTHER WORK.

480-18	23333	Staked road for grading in Secs. 21, 28 and 33, Tp. 46-6-4.
	14040	Established lost corners east of Sec. 6, Tp. 51-12-4.

Progress reports and sketches were forwarded to the Department at the time the surveys and examinations were made.

A number of plans and final returns have already been forwarded to the Department, the remainder are now in course of preparation.

Your obedient servant,

LENNOX T. BRAY,

District Surveyor and Engineer.

EDMONTON, December 17, 1918.

A. P. C. BELYEA,

Assistant Director of Surveys,

Edmonton, Alberta.

SIR,—I am attaching hereto detailed report showing the work done in my district of North Alberta during the past season.

Having organized my party, I took the field on May 20th.

Owing to the exceptionally dry season I was enabled to cover a portion of my district which in ordinary seasons is almost impracticable for wagons and outfits, viz., that portion in the vicinity of Junkins and Chip Lake. I was thus enabled to clean up several pieces of work that have been outstanding for some time.

Acting on your instructions my party was limited to two men on line outside of my assistant and myself. This is really too small a party for work in the bush, where on almost every survey a large amount of chopping is necessary. The picking up of section lines which have previously been opened, in many cases involves the clearing of such lines, as many of them are covered with second growth, and consequently the survey of a small diversion, which in itself does not appear to entail much work is actually more difficult and lengthy than would be apparent were these circumstances not taken into consideration. It must be recognized, however, that it was difficult to get men last season, but I do not anticipate any such difficulty during next season. The elimination of pit digging helped out considerably, but I would strongly recommend that if possible, steps should be taken to dig pits at an early date on this past season's work.

On November 8th I reached Stoney Plain intending to move north of there and attend to some work in that vicinity, but I found that owing to the prevalence of the Spanish Influenza it was practically impossible to arrange for any camping place, or for accommodation for my horses. I, therefore, decided to pull my outfit in for the season and arrived in Edmonton on November 11th, disbanding my party on the following day.

Your obedient servant,

P. N. JOHNSON,

District Surveyor and Engineer.

NEW ROADS.

Survey No.	File No.	Location.
31-14	21516	New road and diversions in Secs. 19, 20 and 30, Tp. 54-5-5, and Secs. 25, 35 and 36, Tp. 54-6-5.
204-14	17538	New road along north boundary Sec. 1, Tp. 56-2-5.
292-14	21618	New road along blind line between Secs. 13 and 24, Tp. 53-10-5.
113-15	22422	New road in Sec. 12, Tp. 56-9-5.
115-15	22389	New road along blind line between Secs. 17 and 20, Tp. 58-9-5.
234-15	22510	New road in Secs. 4, 5, 7 and 8, Tp. 55-10-5.
72-16	23183	New road across Secs. 13 and 14, Tp. 54-9-5.
73-16	23179	New road between Secs. 27 and 34, Tp. 53-8-5.
424-17	24112	New road along blind line between Secs. 27 and 34, Tp. 55-2-5.
547-17	24250	New road along blind line between Secs. 13 and 24, Tp. 53-3-5.
714-17	24357	New road along blind line between Secs. 14/23, 15/22, 16/21, 17/20, Tp. 55-3-5.
71-18	18842-B	New road in Secs. 30 and 31, Tp. 55-6-5.
174-18	24627	New road in Sec. 13, Tp. 54-13-4.
793-18	25274	New road along blind line between Secs. 5 and 8, Tp. 59-8-5

ROAD DIVERSIONS.

736-14	22313	Diversions in Secs. 1 and 2, Tp. 57-7-5.
811-14	22207	Diversions north of Secs. 9, 10, 11 and 12, Tp. 55-3-5.
50-15	22341	Diversion in N.W. $\frac{1}{4}$ Sec. 27, Tp. 56-10-5.
56-15	22318	Diversions in Secs. 11, 15, 22, 26, 27, 34 and 35, Tp. 55-3-5.
804-15	23020	Diversions in Sec. 25 and Hudson's Bay Reserve, Tp. 57-3-5
54-16	23111	Diversions in Secs. 31 and 32, Tp. 56-3-5.
75-16	23181	Diversion in N.E. $\frac{1}{4}$ Sec. 34, Tp. 54-9-5
239-16	23119	Diversion in Secs. 34 and 35, Tp. 54-7-5.
538-16	23562	Diversions in Secs. 1 and 12, Tp. 59-7-5.
582-16	20485	Diversion in S.W. $\frac{1}{4}$ Sec. 29, Tp. 53-8-5.
13-17	20797	Diversion in W. $\frac{1}{2}$ Sec. 9, Tp. 55-1-5
14-17	23779	Diversion in S.E. $\frac{1}{4}$ Sec. 25, Tp. 56-2-5
25-17	21688	Diversion and railway crossing at Fallis in Sec. 15, Tp. 53-5-5.
223-17	23941	Diversions in W. $\frac{1}{2}$ Sec. 31, Tp. 53-4-5 and W. $\frac{1}{2}$ Sec. 1, Tp. 54-5-5.
187-18	24625	Diversion in N.W. $\frac{1}{4}$ Sec. 7, Tp. 53-1-5.
278-18	23321	Diversion in W. $\frac{1}{2}$ Sec. 22, Tp. 44-16-4.
317-18	24723	Diversion in N.E. $\frac{1}{4}$ Sec. 31, Tp. 46-18-4.
318-18	24724	Diversion in N. $\frac{1}{2}$ Sec. 33, Tp. 46-16-4.
936-18	20564	Diversion and railway crossing in E. $\frac{1}{2}$ Sec. 16, Tp. 54-14-5 (Peers).

RE-SURVEYS.

854-17	14538-C	Re-survey of Lac Ste. Anne Trail in Secs. 31, 32 and 33, Tp. 54-27-4, and in Secs. 4 and 5, Tp. 55-27-4.
--------	---------	----------------------------------------------------------------------------------------------------------

CHANGES IN SURVEYED ROADS.

630-15	15114-D	Change in surveyed road in Sec. 24, Tp. 53-5-5.
652-18	23225	Change in surveyed road and survey of railway crossing in N.E. $\frac{1}{4}$ Sec. 2, Tp. 54-16-5 (Wolf Creek).

MISCELLANEOUS.

513-15	14000	Examination re complaint of flooding in N.E. $\frac{1}{4}$ Sec. 19, Tp. 56-2-5.
--------	-------	---------------------------------------------------------------------------------

EXAMINATIONS.

233-15	22508	Examination re proposed road between north and south halves of Sec. 26, Tp. 53-10-5.
74-16	23180	Examination re proposed diversion in S.E. $\frac{1}{4}$ Sec. 3, Tp. 55-9-5
76-16	23182	Examination re proposed diversions in E. $\frac{1}{2}$ Sec. 36, Tp. 53-9-5 and E. $\frac{1}{2}$ Sec. 1, Tp. 54-9-5.
77-16	23184	Examination re proposed new road in Secs. 35 and 36, Tp. 54-7-5 and Sec. 2, Tp. 55-7-5.

Survey No.	File No.	Location.
694-17	24352	Examination re private road in N.W. $\frac{1}{4}$ Sec. 9, Tp. 55-3-5.
6-18	24474	Examination re proposed diversions in Secs 26, etc., Tp. 53-10-5.
259-18	14538-B	Examination of road allowances north and west of Sec. 36, Tp. 54-2-5.
430-18	24835	Examination of road diversion proposed by C. N. R. in N.E. $\frac{1}{4}$ Sec. 16, Tp. 53-7-5.
840-18	23379-B	Examination of proposed change in surveyed road in Secs. 18 and 19, Tp. 57-5-5 and Sec. 13, Tp. 57-6-5.

CALGARY, December 18, 1918.

A. P. C. BELYEA,

Assistant Director of Surveys,

Edmonton.

SIR,—I have the honour to submit the following report of work performed in the Calgary district during the season of 1918.

As usual, the winter months were spent in preparing plans of surveys made during the previous season.

In May I organized my party and started field work west of Calgary. I then moved south to the Okotoks district, attending to some urgent surveys in the foot hills south-west of Priddis. I then moved south, completing all surveys in the foot hills west of the C. & E. Railway, and also a few to the east. Owing to some urgent work in the northwest part of my district I then moved north through Calgary and Airdrie. After completing all the surveys on my schedule in the north-west part of the district I moved east through Cremona and Carstairs over to the district north of Acme, through Twinning and Carbon, making all surveys asked for in those districts. I completed my district south-west of Drumheller.

During the first four months I was without the services of an assistant, and together with the small party the work in the brushy country south-west of Calgary was greatly retarded.

The season has been favourable for field work, and I was able to clear off a great many outstanding surveys, although some in the remote parts of my district will have to be carried over till next season.

Besides the regular field work of the party I made a number of surveys and examinations, and altogether I consider the season's work very satisfactory.

Following is a list of surveys and examinations.

Your obedient servant,

W. H. YOUNG,

District Surveyor and Engineer.

ROAD DIVERSIONS.

Survey No.	File No.	Location.
104-15	22361	In S.W. $\frac{1}{4}$ 13-28-23-4.
718-15	22891	In N.W. $\frac{1}{4}$ 12-30-2-5.
336-16	23420	In W. $\frac{1}{2}$ Sec 22-15-28-4.

Survey No.	File No.	Location.
509-16	23199	In Secs. 10 and 11-19-2-5.
690-16	20044	In N.E. $\frac{1}{4}$ Sec. 19, and blind line bet. 18/19-15-29-4.

947-18	23151	Re change in Sec 14-20-20-4.
946-18	24303	Re change in Sec. 13-22-21-4.

LETHBRIDGE, December 16, 1918.

A. P. C. BELYEA,

Assistant Director of Surveys,

Edmonton, Alberta.

SIR,—I have the honour to submit the following report in connection with road surveys in the district of South Alberta during the year 1918.

After returning from my holidays in March I completed plans of surveys made in 1917, organized my party and went into the field on the 3rd day of May. I commenced survey operations south of Raymond in the Milk River Ridge, then worked north into the Little Bow River in Townships 11 and 12-19, W 4th, then westerly along the Little Bow River in the northern part of my district through Carmangay, Stavely and Claresholm into the Porcupine Hills.

All necessary surveys were made along the valley of Willow Creek, in the vicinity of Furman and Meadow Creek, thence along the east slope of the Porcupine Hills to the Old Man River, where I turned westerly through Spring Point and Summer View on to the

Livinstone River, thence northerly along the Livinstone River on the west slope of the Porcupine Hills as far as Township 10-1 W 5th, where I completed the season's work on the 15th of December.

In Municipal Districts, Councillors were interviewed in connection with surveys, and all of these appeared to be satisfied with what has been done.

As a whole, the season has been a favourable one for survey operations, except that feed has been scarce, especially out on the prairie district.

Below is a list of Examinations, Road Diversions, Surveys Checked, Surveys Changed and New Road Surveys.

Respectfully submitted,

Your obedient servant,

R. J. GORDON,

District Surveyor and Engineer.

EXAMINATIONS.

Survey No.	File No.	Location.
940-18	15077-B	Road west from Furman in Tp 11-30-4 and Tp. 11-1-5.
286-12	20244	In Secs. 10, 11 and 14, Tp. 9-1-5.
98-16	23197	In Sec. 6, Tp. 13-28-4.
289-16	21919	In Sec. 32, Tp. 11-27-4.
563-16	23566	In Secs. 25 and 36, Tp. 7-30-4.
2-17	16616-D	In Sec. 2, Tp. 14-28-4.
531-17	24216	In Secs. 28 and 29, Tp. 12-21-4.
694-18	17673-B	In Sec. 35, Tp. 7-29-4.
942-18	14638-B	Road allowance N of Sec. 32, Tp. 5-26-4, in Secs. 7, 8 and 9, Tps 10-2-5.
939-18	15150	Extension of 3rd Street West in Town of Magrath.
	30248	Road allowance N and W. of N.W. $\frac{1}{4}$ Sec. 21-2-16-4.
945-18	21636	In Sec. 22, Tp. 12-19-4.

DIVERSIONS.

645-18	25149	In Secs. 4 and 5, Tp. 13-28-4.

DRAINAGE BRANCH

EDMONTON, January 20, 1919.

L. C. CHARLESWORTH, Esq.,
Deputy Minister of Public Works,
Edmonton, Alta.

SIR,—I beg to submit the following report of the work of the Drainage Branch during the year 1918.

Two districts have been constituted "Drainage Districts" under The Drainage Act, by Order in Council—No. 1, south of Holden, and No. 6, surrounding the Village of Viking.

Tenders were called for the work on District No. 1 in May, but owing to changes having been made on the plans, and also to the high cost of labour, the tenders received were in excess of the estimated cost. The matter was again referred back to the resident owners, with the result that the prosecution of the work was endorsed. The contract for the excavation work only, was let in August. Two ditching machines had been at work for a month before winter set in. The cost of the excavation of the ditches in this district will be \$126,000.

District No. 6 is a much smaller scheme. Tenders were called for this work and owing to the fact that the lowest tender exceeded the estimate, the resident owners had again to be consulted. In this case also, the majority were in favour of proceeding with the construction work and the contract has been let although winter set in before any work could be carried out. This scheme will cost in the neighbourhood of \$27,000.

The stages to which the different districts petitioned for under The Drainage Act have advanced, are as follows:

(1) Parts of tps. 47 and 48, in range 15; of tps. 46, 47 and 48, in rg. 16; of tps. 46, 47 and 48, in rg. 17; all west of the 4th Meridian. Drainage District constituted, contract for construction work let and a beginning made on excavation.

(2) Parts of tps. 44 and 45 in rg. 14; of tps. 44 and 45 in rg. 15; and tps. 44 and 45, rg. 16; all west of 4th Meridian. Survey work practically completed.

(3) Parts of tp. 44, rg. 13; and tp. 44, rg. 14, west of 4th Meridian. Survey work completed, assessment made, appeals against assessment heard, but calling for tenders deferred until labour conditions are more favourable.

(4) Parts of tps. 42, 43, 44, 45, 46, in rg. 16; of tps. 43, 44, 45, in rg. 17; and of tps. 44 and 45 in rg. 18; all west of 4th Meridian. Survey work completed and assessment made.

(5) Parts of tps. 46 and 47, in rg. 17; of tps. 45, 46, 47 and 48, in rg. 18; all west of 4th Meridian. Survey work completed and assessment made.

(6) Parts of tps. 47 and 48 in rg. 12; and of tps. 47 and 48, in rg. 13; all west of 4th Meridian. Drainage District constituted and contract for construction work let.

(7) Parts of tps. 35 and 36 in rg. 2; and of tps. 35 and 36 in rg. 3; all west of 5th Meridian. Survey work completed, assessment made, appeals heard, but matter referred to Board of Assessors for readjustment.

(8) Parts of tp. 42 in rg. 14; and of tps. 41 and 42 in rg. 15; west of 4th Meridian. Survey work completed and assessment made.

(9) Parts of tp. 37 in rg. 20; of tps. 37 and 38 in rg. 21; all west of 4th Meridian. Survey work completed.

(10) Parts of tp. 45 in rg. 23; and of tp. 45 in rg. 24; all west of 4th Meridian. Survey work completed and assessment made.

Of the Petitions for the formation of new Districts which were received during the year, one complied with the requirements of the Act and will be investigated. The area included is that surrounding Beaverhills Lake in tps. 50, 51, 52 and 53, rgs. 17 and 18, west of 4th Meridian.

In some of the Drainage Districts, there are Dominion Lands which the Reclamation Act provides shall be turned over to the Provincial Government, but no actual transfers of land have yet taken place.

Although the year 1918 was unusually dry, Municipalities and private individuals requested the services of Engineers for the giving of levels and advice as to drainage. Examinations were made of 60 different projects and where drainage work was found feasible, ditches were staked out and profiles and estimates of cost provided.

Your obedient servant,

A. MACDONALD,

Drainage Engineer.

THE MINES BRANCH

EDMONTON, February 15, 1919.

L. C. CHARLESWORTH, ESQ.,
Deputy Minister of Public Works,
Edmonton, Alberta.

SIR,—In accordance with the provisions of The Mines Act, I herewith submit my report of the Mines Branch for the year ending December 31, 1918.

The Mines Act, which became effective on August 1, 1913, was amended at the 1918 Session of the Legislature, the principal changes made being provisions for bringing all operations, incidental to the extraction of coal by removing the over-lying strata, within the scope of the Act, and for requiring monthly reports with reference to output, etc., to be made to the Minister, instead of yearly reports as formerly. The Act was also amended to give the Lieutenant Governor in Council power to grant leases for mining coal under road allowances, to make arrangements for the installation and operation of mine rescue stations, and to make regulations regarding wash-houses and emergency hospitals.

The list of permitted explosives was amended on November 5, 1918, so that this list contains now only the explosives known as Monobel No. 1, Polar Permitite, Viking No. 1, and Dynobel No. 2.

The most serious accident which occurred during the year was at the mine operated by the Oliphant-Munson Collieries, Ltd., near Coalspur, in which a building containing a small amount of powder was destroyed by fire, with the result that the powder exploded, killing the manager and blacksmith, and injuring four men seriously and eleven slightly. A fire also occurred during December, 1918, at Cardiff, by which the office of the Cardiff Collieries, Ltd., was completely destroyed. No satisfactory explanation could be obtained as to the causes of these fires.

During the year underground fires occurred at the mines operated by the Cardiff Collieries, Ltd., the Lakeside Coals, Ltd., the Humberstone Coal Company, Ltd., and the Franco-Canadian Collieries, Ltd. The fire at the mine operated by the Cardiff Collieries, Limited, has been in existence for several years, and it was thought that it had been successfully cut off from the workings, but during the month of August it found its way through several barrier pillars, the result being that the management was forced to abandon that portion of the mine. The fire which occurred at the mine operated by the Lakeside Coals, Limited, took place during the month of May in an abandoned portion of the mine. These workings were afterwards sealed off by stoppings and water pumped into this area by an electrically driven pump, but the fire has not yet been extinguished. It would appear that the fire which broke out in the mine operated by the Humberstone Coal Co., Ltd., near Clover Bar, had been caused by coal burning on the outcrop of the seam on the banks of the North Saskatchewan river several years previously. The area in which this fire occurred was sealed off by clay stoppings which were later rein-

forced by brick and cement. During the month of April an explosion occurred in the mine operated by the Franco-Canadian Collieries, Ltd., by which two men were slightly burned about the face and hands. This explosion, as far as could be ascertained, was caused by gas coming in contact with a fire which had been burning for several years in the upper portion of the mine, and which had been sealed off. The pillars surrounding the area where the fire was burning, caved, with the result that the gas became ignited. This mine is now abandoned.

An explosion of gas took place during the year in the mine operated by the Canmore Coal Co., Ltd., by which five men were more or less injured. This explosion was the result of insufficient inspection of the place where the shot was about to be fired. The effects of the explosion was felt for approximately 200 feet from the point of ignition, but the dust present did not show any signs of coking. Another explosion of gas occurred in the No. 3 mine operated by the Department of Natural Resources of the Canadian Pacific Railway Company at Lethbridge, by which a small quantity of gas, which accumulated in a cavity in the roof was ignited.

During the year twenty-two persons lost their lives from accidents as compared with twenty-four during the year 1917. Of these fatal accidents, three occurred above ground and nineteen below ground. Sixteen persons were seriously injured above ground and forty-four below ground, and twenty-one persons were slightly injured above ground and fifty-six below ground.

In addition to the inspections which have been made, from time to time, of the different mines by the District Inspectors, all fatal and serious accidents have been investigated and all inquests attended.

Samples of mine air have been taken throughout the year by the District Inspectors, in addition to tests made by them, with the Burrell Gas Detector. These samples have been forwarded to the Department of Mines, Ottawa, and to the University of Alberta for analysis.

2,881 safety lamps of the Wolfe type, 35 of the Koehler type, 13 of the Marsaut type, 1,960 electric portable lamps of the Edison type, 600 of the Wico type and 50 of the Ceag type are in use. It will be noted that a considerable increase has taken place in the number of electric safety lamps in use, compared with previous years.

Training in connection with Mine Rescue work has been carried on satisfactorily throughout the year, there being three mine rescue cars and six stations at present in operation. Several appointments were made to fill vacancies caused by the resignations of Superintendents, and in every case a returned soldier received the appointment. When these appointments are made, due consideration is given to a man's efficiency and experience in mining, and in all cases these positions are being satisfactorily filled. On July 1, 1918, a competition in Mine Rescue and First Aid Work was held under the auspices of the Rocky Mountain Branch of the Canadian Mining Institute, at Lethbridge. Fuller particulars of this competition are given in the report under the heading of Mine Rescue Work.

There were 317 coal mines, two copper ore and two shale mines in operation during the year, seventy of which were opened, nine re-

opened and seventy-one abandoned. The mines in the Peace River District which were opened in 1916 have been abandoned, and no coal was produced in that district during the past year.

The total output of coal for the year 1918 was 6,148,620 tons, exceeding that for the year 1917 by 1,285,206 tons. The largest monthly production was during the month of January, when 646,368 tons were produced. Alberta is now in the position, for the first time, of being the largest coal-producing Province in Canada, 40.54 per cent. of the whole output of the Dominion being produced in Alberta.

Nine persons were prosecuted for contravention of The Mines Act during the year, convictions being obtained in each case.

Several changes in the staff of inspectors took place during the year. Mr. James Crowder, formerly manager of the Drumheller Land Co., Ltd., at Drumheller, was appointed District Inspector of Mines, succeeding Mr. William Stevenson, who took the position of General Manager of the Hillcrest Collieries, Ltd., at Hillcrest. Mr. Robert J. Lee, formerly manager of the Rock Springs Coal & Brick Co., Ltd., at Elcan, was appointed District Inspector of Mines for the Edmonton District, this being an additional appointment.

Mr. John W. Hooks was appointed superintendent of Mine Rescue Car No. 3, and Mr. Edward Royle, superintendent of Mine Rescue Car No. 1.

The number of persons employed in mines during December, 1918, was 10,209, being an increase of 397 over the number employed during December, 1917.

The question of widening the market for Alberta coal has received a great deal of attention during the past year, the result being that the amount of coal produced during 1918 exceeded the amount produced during 1917 by 26.42 per cent. On April 29, 1918, I was appointed Fuel Administrator by the Provincial Government to assist Mr. C. A. Magrath, Fuel Controller for the Dominion of Canada. A considerable amount of advertising was done through newspapers and other publications, and in addition a film, 1400 feet in length, showing the different mining operations, was produced, and is at present being shown in different theatres in the Province of Manitoba. Unfortunately the cost of production and freight rates have increased during the last two years to such an extent that it is difficult for Alberta coal to compete satisfactorily against American coal in the Manitoba and Saskatchewan markets. The average cost of production for labor alone, during the twelve months ending May 31, 1918, was \$2.07 per ton for domestic run of mine coal and \$2.01 per ton for steam run of mine coal as compared with \$2.36 per ton for domestic coal and \$2.18 per ton for steam coal for the six months ending December 31, 1918. In addition to this the cost of material has also increased to a great extent.

Although the amount of coal produced during 1918 was considerably in excess of that produced during 1917, this amount only represents approximately 50 per cent. of the possible production in the Province with the present development, and if anything is to be done to obtain the Manitoba market by having a decreased cost of production, the first thing to consider is the question of regulating the

production in such a way that the coal mines in operation should produce at least 80 per cent. of what they are capable of doing. It is also important that only the best grades of coal which we can produce in the Province are shipped into the markets where Alberta coal has to compete with imported coal, and this can only be done by instituting a system of zoning such as has been done in the United States during the last two years. The procedure would, of course, be harmful to the mines producing low grades of fuel, inasmuch as their market would be restricted, but it would undoubtedly be to the benefit of the Province as a whole.

The payroll for labor, at mines alone, during the year 1918, was approximately \$14,000,000, so that it will readily be seen the important part which the mining industry will take in the Province if it is conducted along proper lines.

From figures supplied by the Federal Government, there is a market available for Alberta coal of approximately nine million tons per year, and at least fifty per cent. of this market can only be obtained if all coal is properly prepared, and only that of the best quality is sold in the territory into which American coal is shipped.

*SUMMARY OF STATISTICS

Number of short tons of coal produced	6,148,620
Number of short tons of briquettes produced	100,470
Number of short tons of coke produced	32,858
Number of short tons of shale produced for making bricks	9,898
Number of short tons of bricks sold	7,687
Number of coal mines in operation	317
Number of copper ore mines in operation	2
Number of shale mines in operation	2
Number of mines opened	70
Number of mines re-opened	9
Number of mines abandoned	71
Average number of persons employed above ground	2,633
Average number of persons employed below ground	6,141
Number of separate accidents causing loss of life	21
Number of deaths caused by accidents above ground	3
Number of deaths caused by accidents below ground	19
Number of serious accidents above ground	16
Number of serious accidents below ground	44
Number of slight accidents above ground	21
Number of slight accidents below ground	56
Number of persons prosecuted under The Mines Act	9
Number of Provisional Overmen's Certificates issued during 1918 ..	223
Number of Third Class Certificates issued during 1918	45
Number of Second Class Certificates issued during 1918	28
Number of First Class Certificates issued during 1918	3
Number of Mine Surveyors' Certificates issued during 1918	7
Number of Mine Rescue Certificates issued during 1918	108
Total number of Third Class Certificates issued to date	532
Total number of Second Class Certificates issued to date	253
Total number of First Class Certificates issued to date	185
Total number of Mine Surveyors' Certificates issued to date	140
Total number of Mine Rescue Certificates issued to date	448

* Complete statistics in connection with coal mining in the Province are published in a separate report of the Mines Branch

Your obedient servant,

JOHN T. STIRLING,

Chief Inspector of Mines.

STEAM BOILERS BRANCH

EDMONTON, January 16, 1919.

L. C. CHARLESWORTH, Esq.,
Deputy Minister of Public Works,
 Edmonton, Alta.

SIR,—I have the honour to submit to you herewith my report covering the work performed by the Steam Boilers Branch during the year ending December 31st, 1918, in accordance with the provisions of The Boilers Act.

Notwithstanding the difficulties experienced during the latter part of the year, owing to serious crop shortage, followed by the epidemic of Spanish Influenza, I am pleased to be able to report that a fairly good average year's work has been accomplished, as will be seen from the individual reports appended hereto from the district inspectors. As a result of the crop shortage at least thirty per cent. of the agricultural boilers were out of service, and consequently not available for inspection, although the weekly returns show that a large number of them were visited by the inspectors during their itinerary through the districts, but were not subject to inspection when the owners did not intend to operate before the end of the year. Portions of each inspection district, including towns and villages, were quarantined during the epidemic, thereby preventing access to the boilers at such points, which also materially increased the car mileage and time lost in travelling from one point of inspection to another. These features have, as you will note, tended to increase the cost of inspection per boiler. It may be added that four of the inspectors were down with the flu, two of them having taken it twice, another was temporarily disabled by injury to his knee while climbing through a boiler manhole.

Acting upon your instructions to abolish the office of assistant inspector of boilers and appoint each member of the staff to an individual district in order that the new license laws, respecting traction and portable boilers, might be administered to better advantage, we subdivided the five original districts into nine inspection areas last April and allotted one to each inspector with headquarters as follows:

Inspector N. Marshall	Sherlock Building, Lethbridge.
" W. Gray	444-8th St. S.E., Medicine Hat.
" A. W. Dick	Lane Block, Main St., High River.
" J. Buxton	Provincial Public Works, Calgary.
" A. Bradshaw	Hanna.
" J. Douglas	Gaetz Ave., Red Deer.
" J. F. Hawkins	Bakken St., Camrose.
" J. H. Mainwaring	Vegreville.
" J. F. Cargill	9927-84th Ave., Edmonton S.

The vacancy in the staff of Inspectors, due to the resignation of Mr. T. J. Hargraves of Lethbridge in the month of December, 1917, was filled by the appointment of Mr. A. Bradshaw as District Inspector of Boilers with headquarters at Hanna in the month of June last.

In addition to the regular monthly examinations of candidates for Engineers' Certificates which are held at the headquarters of each Inspector, twenty-eight fully advertised examinations were held during the month of March at outside places in the northern part of the province, chosen specially for convenience of access, in order to permit of candidates in the outlying districts being accommodated, who otherwise would be put to considerable loss of time and money through having to attend examinations at headquarters. Inspector Mainwaring going as far north as Grande Prairie, Spirit River, High Prairie and Peace River Crossing to accommodate candidates in that territory. It may also be added that special arrangements were made for Mr. Mainwaring to re-visit these places at a later date on a boiler inspection tour, which occupied his time from the 15th of July to the 15th of September, during which he made a survey of about 75 boilers, including some as far north as Fort Vermilion.

Referring to the 1918 amendment to The Boilers Act, I am pleased to be able to report that these have proven of much assistance in promoting the interests of all concerned in boiler inspection service. Sections 4 to 9 inclusive, dealing with the licensing of traction, portable, and semi-portable boilers, were thoroughly advertised through the medium of the newspapers and in addition a circular letter, bearing on the subject, together with an application form for license, was sent under registered cover to some 2,200 owners of this type of boiler. Of this number, 1,496 made application for, and received license plates during the eight months following the enactment of these measures, this being 68 per cent. of the total number affected by them. The balance of the boilers of this type on record with the Department being out of service for reasons already explained. Remarkably few complaints have been received from owners respecting this new departure, or regarding the increase in inspection fees which the new amendment also provided for. I might add that the large amount of extra clerical work created by the administration of the new sections of The Act was undertaken without any increase in the office staff.

The additional work of inspecting Air Tanks and Receivers carrying working pressures exceeding 75 pounds, as provided in Section 11, is also progressing very favorably. These are being overhauled largely during the winter months. A number of plants have been equipped with safety valves, blow down valves and gauges where found deficient, and the piping arrangements of several have been altered with a view to rendering them safe. The working pressures on a number of galvanized tanks have been reduced to a safe limit, especially those in service in public places, such as garages and free air stations. Particulars of these, you will remember, were reported to you in detail last year and resulted in your arranging for their supervision by this Branch.

You will be interested to learn that the Commissioners of the School Board in the city of Calgary have made arrangements for our Inspector to periodically examine the heating boilers in all the public schools in that city, feeling quite satisfied that our inspection is equal to, if not superior to that given by the Insurance Company at a much higher figure.

The past year has been remarkably free from personal injury to anyone in connection with the operation of boilers and engines, no

report having reached the Department of a single case and only a few boiler accidents have been reported. The most noteworthy of the latter being as follows:—

Six 72 inch by 18 feet horizontal tubular boilers contained in the plant of the Ogilvie Flour Mills Company, Medicine Hat, operating under a working pressure of 150 pounds per square inch, were badly over-heated, due to an accumulation of oil on the shell plates. The fire sheets on four of the boilers were so badly damaged that it was decided to ship them to Winnipeg for repairs. New front courses 9-16 inch thick had to be fitted to these and the back and front tube sheets straightened, stays refitted and the boilers re-tubed throughout. Inspector Gray, who surveyed the boilers some time before the damage was done, drew the attention of the Company to the fact of there being oil in the boilers and gave instructions to have all of them thoroughly cleaned out, also to have the condenser filter, which is located between the discharge from air pump and hot well, remodelled so as to more efficiently eliminate the oil from the feed water. Had these instructions been carried out it would have prevented the development of this dangerous situation and have saved the Company thousands of dollars of needless expense in addition to much inconvenience caused by having to close down the mill.

A 54 inch by 18 foot Robb Brady Boiler in service at the North American Collieries plant, Lovett, was reported unsafe by the Master Mechanic, W. H. Hilton, upon his taking charge of the plant. The boiler was at once surveyed by Inspector Cargill, who reported that the furnace tube sheet had cracked through 8 ligaments owing to a heavy deposit of scale having cemented the tube ends together, the whole being solid with the tube sheet, thus preventing the transmission of heat to the water, which resulted in the overheating of the plate. This section of the sheet was forced outwards by internal pressure $\frac{1}{2}$ inch, being just held by one-half of a ligament (about 3-8 inch wide) from being blown out altogether. The Certificate of the former Master Mechanic was temporarily suspended for having permitted the boiler to operate under these conditions, the evidence proving that the crack had gradually developed throughout a period of over six months without being reported to the Department.

Another accident occurred to a 72 inch by 18 foot horizontal tubular boiler at the Camrose Electric Light and Waterworks plant, particulars of which are given in Inspector Hawkins' report appended hereto.

Two Engineers have been suspended for a period of six months, each for having neglected to wash out a 60 inch by 16 feet H. T. boiler, operating at the Western Canada Flour Mills Co., South Edmonton. This boiler had been allowed to run continuously day and night between four and five months without being opened up until the fire sheet became over-heated and forced down near the front head, due to the accumulated deposit. The damaged portion of plate was removed and a patch welded to the sheet and riveted to the front head flange.

Five other Engineers have been reported for minor offences and have been censured.

A number of damaged boilers have been repaired during the year by means of the Oxy-Acetylene and Electric Welding processes, principally to fireboxes, tube sheets and in several cases to the shell

plates of cylindrical boilers. In the latter cases permission to weld has only been granted where the patch abutted against a circumferential seam, thus providing for one side of the patch to be riveted, since it is generally admitted by the best authorities that, where plates are subjected to tensile stress, also to the impact of heat and flame, welded sections have not proved reliable unless supported by stays or rivets, particularly those undertaken by the Oxy-Acetylene process.

An Interprovincial conference was held in Winnipeg between August 26th and September 7th at the Provincial headquarters of The Bureau of Labour, for the purpose of drafting a uniform code of regulations throughout the Dominion, to govern the construction and inspection of all steam boilers, steam heating plants, compressed air tanks and any other tanks or reservoirs used for holding liquid and gaseous substances. Seven provinces sent delegates: British Columbia, Alberta, Saskatchewan and Manitoba being represented by their respective Chief Inspectors; Ontario, by the Chief Inspector, in company with the Chairman of the Bureau of Labour for that province. Nova Scotia was represented by the Minister of Public Works and Mines, and Quebec by the Chief Engineer of the Montreal Waterworks and a member of the Engineers' Examining Board.

I am pleased to report that the conference was a very successful one and the results have, so far, exceeded our expectations. Unfortunately, time did not permit the Board to undertake the work of formulating any regulations for air and gas tank construction, or for an Interprovincial Boilers Act, or the question of framing measures to provide for standard examinations of Engineers and the issue of graded Certificates which would be acceptable throughout the Dominion. These questions were briefly discussed by the Board, but had to be left over for future sessions, which, it was agreed, should be held every six months if sanctioned by the respective Provincial Governments who were represented.

A draft of the proposed code arrived at is about completed, but is now being held pending the decision of the members of the Board regarding the new A.S.M.E. code for heating plants, which they wish to consider in conjunction with what has already been decided upon, the general desire being to act in uniformity with U.S. practice as far as possible, without losing sight of Canadian and British methods and standards.

Since returning from Winnipeg at the close of the conference, a considerable portion of my time has been devoted to going over the proposed draft of uniform regulations, a large volume of business having, of necessity, been left over to be handled later by correspondence. Mr. Peck, the Chairman, and Mr. Blackburn, the Secretary, having been appointed to draw up the final draft. This work it was found would be somewhat heavy, for Mr. Blackburn at any rate. consequently, I volunteered to assist him in every possible way, with a result that the heating boiler regulations were turned over to me and I formulated a draft for their consideration. I may also say that several questions bearing on the regulations have been submitted by various manufacturers, who, of course, are taking a most lively interest in the matter, and it may be necessary for us to meet again at an early date, as I understand that the whole of the regulations have now been reduced to definite shape and are about ready for further consideration by the Board.

Regarding the revenue of the Branch; I am pleased to be able to report a substantial increase in the total amount of fees collected from all sources which exceeds that of last year by \$6,204.84. This increase is largely due to the efforts made by you to secure provision for a general increase in the tariff for boiler inspections, as well as for the issue of First and Second class Certificates and Permits. It was hoped that with the increase in tariff our revenue would practically equal the expenditures for the year, which amounts to \$35,384.14 and it would undoubtedly have done so had it not been for the crop shortage and epidemic already referred to, which was responsible for reducing the number of boilers by about 1,000, that otherwise would have been available for license and inspection.

A total of 1,026 Engineers' and Firemens' Certificates were granted to successful candidates during the year, 34 of these being granted free to members of His Majestys' Forces, who had seen active service overseas, as provided for by Order-in-Council 551-18.

Under the provisions of Section 39 of the Act, 207 Permits were issued to owners of boilers and engines who were unable at the time to secure the services of duly qualified engineers.

The total expenditure for the year was-----	\$35,384.14
The total revenue for the year was -----	26,667.19

Boilers visited for inspection purposes total 2,389, comprising 1,984 high pressure and 405 low pressure boilers.

A summary of the various types of boilers inspected during the year is as follows:

Horizontal Tubular -----	472
Horizontal Furnace -----	93
Return Tubular -----	17
Locomotive -----	1181
Vertical -----	210
Water Tube -----	94
Air Receivers -----	65
Steel Heating -----	124
Cast Iron Heating -----	133
Total -----	2389

The condition of these boilers was found to be as follows:

Good -----	1527
Fair -----	693
Moderate -----	125
Poor -----	38
Condemned -----	6
Total -----	2389

Convictions were obtained in six cases of prosecution for violation of The Boilers Act. The aggregate fines imposed and collected amounted to \$175.00.

A schedule of Certificates Issued, Fees Collected, Expenditures of the Branch, and Inspectors' Annual Reports follow.

I have the honour to be, Sir,

Your obedient servant,

F. W. HOBSON,
Chief Inspector of Boilers.

DEPARTMENT OF PUBLIC WORKS

SCHEDULE

	1917	1918
Number of Certificates issued for boilers inspected	2259	2105
Number of advertised examinations held for engineers -----	29	28
Number of First Class Certificates issued -----	9	6
Number of Second Class Certificates issued ----	41	26
Number of Third Class Certificates issued -----	144	135
Number of Traction Final Certificates issued ----	230	163
Number of Firemens' Final Certificates issued --	27	55
Number of Provisional Certificates issued -----	581	447
Number of Renewal of Provisional Certificates issued -----	169	177
Number of Second Provisional Certificates issued --	26	19
Number of Permits issued -----	341	207

FEES COLLECTED

	1917	1918
For inspection of boilers -----	\$10,576.00	\$ 7,583.00
For special inspection of boilers, etc. ----	1,955.85	1,420 19
For examination of candidates for final Certificates -----	2,285.00	1,910.00
For Provisional Certificates -----	2 915.00	2,887.50
For Renewal of Provisional Certificates --	423.50	-----
For Second Provisional Certificates ----	130.00	95.00
For Permits -----	1,705.00	1,445.00
For Survey of Drawings -----	475.00	166.50
For the issue of boiler license plates --	-----	11,160.00
Total -----	\$20,462.35	\$26,667.19

EXPENDITURES

For the year ending December 31st, 1918, in connection with the administration of The Boilers Act	
Salaries and expenses -----	\$28,277.75
Operation of six automobiles -----	2,982 59
Railway transportation -----	705.25
Printing, advertising and sundries -----	3,418.55
Total -----	\$35,384.14

LETHBRIDGE, January 2, 1919.

L. C. CHARLESWORTH, ESQ.,
Deputy Minister of Public Works,
 Edmonton, Alta.

SIR,—I have the honour to submit to you my annual report for the year ending December 31st, 1918.

Engineers' examination have been held in my office in the Sherlock Block, Lethbridge, on the first Saturday in each month throughout the year. The following shows the number, and classes of certificates recommended:

First Class Certificates -----	1
Second Class Certificates -----	6
Third Class Certificates -----	13
Traction Final Certificates -----	31
Provisional Certificates -----	78
Locomotive Certificates -----	3
Firemens' Final Certificates -----	5
Total -----	137

Five candidates failed to obtain certificates for the class they were trying for, but were granted certificates of a lower grade.

A total of 267 boilers were inspected by me during the year, types and condition of same being as follows:

Types of boilers inspected:

Locomotive	116
Horizontal Tubular	33
Water Tube	24
Dry Back Marine	2
Robb Mumford	19
Robb Brady	4
Vertical Fire Tube	19
Steel Heating	27
Cast Iron Heating	1
Steam Coils	3
Air Receivers	19
Total	267

Condition of boilers inspected:

Good	205
Fair	56
Moderate	6
Total	267

I have issued 48 Permits under the provisions of Section 39 of The Boilers Act during the year 1918.

I have not made any special inspections during the year.

I have no accidents to report, none having occurred in this district during the year.

There are no cases to report relative to violation of The Boilers Act.

I have the honour to be, Sir,

Your obedient servant,

N. MARSHALL,

Inspector of Boilers, District No. 1.

MEDICINE HAT, January 2, 1919.

L. C. CHARLESWORTH, ESQ.,

Deputy Minister of Public Works,

Edmonton, Alberta.

SIR,—I have the honour to submit to you my annual report as Inspector of Boilers for the year ending December 31st, 1918.

Examinations were held here at the beginning of each month, and the following are the results of same:

First Class Certificates	1
Second Class Certificates	1
Third Class Certificates	7
Traction Final Certificates	8
Provisional Certificates	22
Renewal of Provisional Certificates	17
Total	56

The number of candidates was greatly reduced, as many of the traction engines in this district were not operated.

I inspected a total of 309 boilers during the year, and the following is a summary of the types and condition of same:

Types of boilers inspected:

Locomotive	138
Horizontal Tubular	71
Water Tube	4
Vertical Tubular	8
Cast Iron	44
Steel Heating	42
Tanks	2
Total	309

Condition of boilers inspected:

Good	243
Fair	58
Poor	8
Total	309

Twenty-two Permits were issued under Section 39 of the Act to owners who were unable to secure the services of certified Engineers.

Six boilers in this district were badly damaged, owing to oil being carried over from the condensing equipment with the feed water, and depositing on the heating surfaces, resulting in bulged shell plates and sprung seams. A detailed report was sent to the Department at the time damage occurred.

I am pleased to say there has not been any one fatally or seriously injured in the operation of engines and boilers in this district during the year.

I have the honour to be, Sir,

Your obedient servant,

WM. GRAY,

Inspector of Boilers, District No. 2.

HIGH RIVER, January 2, 1919.

L. C. CHARLESWORTH, ESQ.,

Deputy Minister of Public Works,

Edmonton, Alberta.

SIR,—I have the honour to submit you my annual report as Inspector of Boilers for the year ending December 31st, 1918, as required by section 17, clause 4 of The Boilers Act.

From the beginning of the year until the end of May I worked as assistant to Inspector Buxton in the Calgary district when I was appointed as District Inspector of Boilers and instructed to make my headquarters in High River.

During the year I have recommended the issue of Provisional Certificates after oral examination to 34 candidates and have recommended the issue of renewals of similar certificates in two other cases.

The number of boilers inspected by me during the year total 324, the types and condition of same being as follows:

Types of boilers inspected—

Locomotive -----	212
Horizontal Tubular -----	42
Water Tube -----	20
Vertical -----	26
Cast Iron Sectional -----	5
Air Receivers -----	13
Marine Dry Back -----	3
Gas Absorbtion Tanks -----	3
Total -----	324

Condition of boilers inspected—

Good -----	201
Fair -----	121
Poor -----	2
Total -----	324

Two complaints have been received by me from owners of traction outfits whose boilers they claimed had been damaged through neglect or carelessness on the part of the Engineers in charge. These cases were investigated and particulars of same submitted to the Department for decision.

I have no boiler accidents to report, neither have there been any cases in my district of personal injury to anyone in connection with the operation of boilers and engines.

I have the honour to be, Sir,

Your obedient servant,

A. W. DICK,

Boiler Inspector, District No. 3.

CALGARY, January 2, 1919.

L. C. CHARLESWORTH, ESQ.,

Deputy Minister of Public Works,

Edmonton, Alberta.

SIR,—I have the honour to submit to you my annual report as Inspector of Boilers for the year ending December 31st, 1918, in accordance with Section 17-4 of The Boilers Act.

Examinations of candidates for Engineers' Certificates have been held in the office of the Provincial Public Works, Calgary, on the first Saturday of each month, as a result of which I recommended the issue of the following Certificates:

First Class Certificates -----	2
Second Class Certificates -----	6
Third Class Certificates -----	25
Traction Final Certificates -----	32
Firemens' Final Certificates -----	29
Provisional Certificates -----	89
Total -----	183

A total of 219 boilers have been inspected and 218 Inspection Certificates issued, types and condition of boilers being as follows:

Types of boilers inspected—

Horizontal Tubular	105
Water Tube	14
Loco Firebox	45
Vertical	41
Robb Mumford	5
Marine Dry Back	2
Railway Locomotives	2
Cast Iron Sectional	3
Air Receivers	2
Total	219

Condition of boilers inspected—

Good	90
Moderate	86
Fair	43
Total	219

During the year 20 locomotive boilers of the traction type have had to be repaired, principally in the fireboxes of same, 11 crown sheets have been strightened up and larger radial stays put in up to 1 1-8 inch where required. Six back sheets and firehole rings have been repaired. Six horizontal tubular boilers have been retubed, also ten vertical and eight locomotive type boilers. Four large stationary locomotive boilers have had to be retubed and electrically welded in cracked bridges of the tube sheet, the crown and side sheets of these had also to be strightened up. Two locomotives coming under the Boilers Act have been retubed and thoroughly overhauled, one of them requiring a new firebox with the exception of the crown sheet. Both engines were also given a general overhauling. Eight safety valves were also found to be defective, three being repaired and the balance being replaced by new ones. All the aforementioned work being supervised from this office.

Sixty Permits have been issued during the year under the provisions of Section 39 to owners of boilers who were unable at the time of application to secure the services of duly qualified Engineers.

There have been no accident cases of any kind in this district during the year in connection with the operation of boilers and engines.

I have the honour to be, Sir,

Your obedient servant,

JOS. BUXTON,

Boiler Inspector, District No. 4.

HANNA, January 6, 1919.

L. C. CHARLESWORTH, Esq.,

Deputy Minister of Public Works,

Edmonton, Alberta.

SIR,—I have the honour to submit to you my annual report for the year ending December 31st, 1918, in accordance with section 17-(4) of The Boilers Act.

Examinations of candidates for Engineers' Certificates have been held at Hanna on the first Saturday in each month, as a result of which I recommended the issue of the following certificates:

Second Class Certificates -----	1
Third Class Certificates -----	4
Traction Final Certificates -----	4
Provisional Certificates -----	17
Renewal of Provisional Certificates -----	3
Total -----	29

The following shows the number, type and condition of boilers inspected by me in this district during the year:

Types of boilers inspected—

Locomotive -----	154
Horizontal Tubular -----	20
Water Tube -----	1
Internal Furnace -----	7
Vertical Fire Tube -----	6
Air Receivers -----	2
Cast Iron Heating -----	6
Total -----	196

Condition of boilers inspected—

Good -----	132
Fair -----	37
Moderate -----	23
Condemned -----	4
Total -----	196

I have to report two cases of prosecution under Section 40 and 26 of The Boilers Act. A conviction with fines was secured in both cases.

Thirteen Permits were issued in accordance with Section 39 of The Boilers Act.

I have to report that through a fire which occurred in the boiler room of the power plant at the Hamilton Coal Companys' Mine located at Wayne, Alberta, two boilers were so badly damaged that it was necessary to condemn them for further use as high pressure boilers. Investigation revealed the fact that the miners had been storing their powder in a cupboard located in the boiler room and through careless handling on the part of someone powder had been scattered around the floor. The Engineer dropped some live coals on the floor which ignited the powder and set fire to the whole plant. The Engineer suffered severe injury by being burned with flames.

Inspection work was all completed in this district early in December and from that time to the end of the year I have been assisting Inspector Buxton in overhauling the various heating plants in the city of Calgary.

I have the honour to be, Sir,

Your obedient servant,

A. BRADSHAW,

Inspector of Boilers, District No. 5.

RED DEER, January 2, 1919.

L. C. CHARLESWORTH, ESQ.,
Deputy Minister of Public Works,
 Edmonton, Alberta.

SIR,—I have the honour to submit to you my annual report as Inspector of Boilers in District No. 6, for the year ending December 31st, 1918, in accordance with the provisions of Section 17-(4) of The Boilers Act.

The re-arranging of the inspection districts in the early part of the summer interfered a little with the routine work at that time, otherwise, it has proved to be a distinct advantage in many ways. The fact of there now being three examination centres, where formerly only one existed, greatly reduces the travelling expenses of candidates to a point of examination, as previously from some parts in the district it took from five to eight days for an engineer to make the round trip. The inspector also does not lose so much time in returning to the headquarters at the end of the month. The boiler owners are also better satisfied on account of receiving an improved service and correspondence has been noticeably less.

Letters dispatched during the year total 1,120. Forty-five of these being sent out under registered cover.

I held the usual monthly examinations for Engineers at Camrose on the first Saturday in each month up to and including May, when I was transferred to Red Deer since which time they have been held at that point. The spring examinations were also held at Wainwright, Provost, Sedgewick, Monitor, Coronation, Stettler, Red Deer, Alix and Lacombe.

During the year I recommended the issue of 160 Certificates to candidates, graded as follows:

Second Class Certificates	1
Third Class Certificates	13
Traction Final Certificates	37
Firemens' Final Certificates	2
Provisional Certificates	75
Renewal of Provisional Certificates	21
Second Provisional Certificates	11
Total	160

Two of the candidates were returned soldiers, and, as instructed, no fees were charged them.

During parts of the year some of the plant owners experienced difficulty in securing qualified engineers, but I am pleased to say that conditions in this respect have wonderfully improved. Better conditions have also obtained in the district regarding hours of labour and salaries paid for engineers and firemen, who, in many instances, are now working on eight hour shifts, and in practically all cases their salaries have been increased approximately 50 per cent. This will, I think, lead to the improvement of the calibre of the engineers and tend to stabilize them, as last year I noticed an unusual number of them floating around unnecessarily. Many good engineers have taken up farming and a few with shop experience have gone into the automobile repair business.

During the months of January, February, March and April I inspected stationary boilers at Ardley, Ponoka, Brazeau Collieries, Red Deer, Provost, Coronation, Monitor and Camrose, and during the rest of the year I inspected in the new district from Hobbema down to Acme, east of the Calgary and Edmonton Railway, and part of the district west of that road.

The number of boilers inspected totalled 257 and Certificates issued, 220. 209 being power boilers and the rest heating.

Condition of boilers inspected:

Good	-----	156
Very Fair	-----	85
Fair	-----	16
Total	-----	257

The roads in my district are improving right along, and even out West, around Rocky Mountain House, great improvements can be noticed.

Two special inspections of boilers were made by me during the year, all expenses incidental thereto being defrayed by the owners in accordance with Section 16 of The Boilers Act.

Sixteen Permits were issued to owners under Section 39 of the Act, upon production of satisfactory evidence on Form 20 regarding their inability to secure the services of duly qualified engineers.

No accidents were reported to me during the year, but I have to report that Engineer William Boettger of Mayton practically lost the sight of an eye through the bursting of a gauge glass some time in the year 1917. This was not reported to me until well on in 1918.

One man was prosecuted for violation of Section 38 of the Act, and a conviction obtained.

I have had to recommend the limiting of an Engineer's Second Class Certificate, owing to the unsatisfactory condition in general of the plant over which he had been placed in charge.

Regarding the new regulations for the licensing of traction, portable and semi-portable boilers, I was surprised to find how well boiler owners had attended to this matter, as in only three instances did I find boilers which had been operated without the necessary license. After going into these cases, I found their plea of ignorance regarding the license law was substantiated, so did not prosecute, but merely collected the license fee. In last year's report I mentioned that the farmers were well advised in buying the one man gasoline tractor. This is in the main correct, but am sorry to say that in numerous instances the farmer has been buying poorly designed tractors, with the result that the manufacturers have been gaining experience at his expense.

I have the honour to be, Sir,

Your obedient servant,

JOHN DOUGLAS,

Inspector of Boilers, District No. 6.

CAMROSE, January 6, 1919.

L. C. CHARLESWORTH, ESQ.,
Deputy Minister of Public Works,
 Edmonton, Alberta.

SIR,—I have the honour to submit to you my annual report as Inspector of Boilers for District No. 7 for the year ending December 31st, 1918, in accordance with Section 17-(4) of The Boilers Act.

Engineers' examinations were held by me on the first Saturday of each month during the year in the Fire Hall, Camrose. Below is a summary of the Certificates recommended:

Traction Final Certificates	6
Provisional Certificates	14
Renewals of Provisional Certificates	13
Second Class Certificates	3
Total	36

Three candidates failed to qualify for the class written for, but were granted Certificates of a lower grade.

Part of the territory covered by me in the Rocky Mountain House district had not been visited by an Inspector for some years. Needless to say I found a number of boilers operating in an unsafe condition. One of these I condemned, and on some of the others I cut the pressure down to what I considered a safe limit; some others I sealed up until repaired and a hydrostatic test applied.

The following is a summary of the boilers inspected by me and condition of same:

Locomotive	180
Horizontal Tubular	30
Return Flue	6
Vertical Tubular	9
Heating Steel	15
Heating Cast Iron	20
Air Receivers	3
Total	263

Condition of boilers inspected—

Good	150
Very Fair	69
Fair	26
Sealed up for repairs	17
Condemned	1
Total	263

I have no accidents to report resulting in the personal injury to anyone. The nearest approach to an accident of this nature I have to report is the bagging of a 72 inch by 18 foot horizontal-tubular boiler in the first course, starting about 1½ inches from the front head flange, and extending 15 inches longitudinally by 12 inches circumferentially by 4 inches deep, the metal drawing down to 1-16 inch. This was caused by mud collecting on the fire sheet. The boiler had only been in service one week after washing, and I am satisfied this accident would never have happened under usual operating conditions, as the quantity of dirt I found upon opening the boiler would not, in itself, be sufficient under the ordinary conditions of hand

firing to cause a bulge like this. A mechanical stoker had been installed under this boiler equipped with forced draft and had been in operation one week when this accident happened. It had been the usual custom under the ordinary conditions to wash out every two weeks, but, owing to the intense heat in the furnace, due to the forced draft and the fact of the boiler being forced more than it would be under ordinary working conditions in order to test the efficiency of the stoker, a very small amount of dirt on the fire sheet would cause considerable damage. This fact was evidently not taken into consideration by the engineer in charge and was an error of judgment on his part. The boiler has since been repaired and the pressure reduced to what I considered a safe limit.

Nine Permits were issued under Section 39 of the Act to owners who were unable to secure the services of duly qualified engineers.

Two special inspections were made by me; all expenses incidental thereto being paid by the owner, in accordance with Section 16 of the Act.

I have no cases of violation of the Act to report.

Your obedient servant,

J. F. HAWKINS,

Inspector of Boilers, District No. 7.

EDMONTON, January 3, 1919.

L. C. CHARLESWORTH, Esq.,

Deputy Minister of Public Works,

Edmonton, Alberta.

SIR,—I have the honour to submit to you my annual report as Inspector of Boilers for the year ending December 31st, 1918, in accordance with the requirements of clause 4, section 17 of The Boilers Act.

The months of January and February were devoted to the inspection of boilers situated along the line of G.T.P. and C.N. Railways West of Edmonton. In the month of March I went north as far as Grande Prairie for the purpose of holding examinations of candidates for engineers' certificates at several points in the Peace River country, after which I commenced to inspect boilers in the Vermilion and St. Paul des Metis district, a break being made in this itinerary to permit of my going north again to inspect boilers in that part of the province located north of Mirror Landing, finishing this work at Fort Vermilion.

During the year I have recommended the issue of Engineers' Certificates to 85 successful candidates, classified as follows:

Second Class Certificates	2
Third Class Certificates	4
Traction Final Certificates	6
Firemens' Final Certificates	4
Provisional Certificates	44
Renewal of Provisional Certificates	25
Total	85

266 boilers were inspected by me during the year, the types and condition of same being as follows:

Types of boilers inspected—

Horizontal Tubular	22
Locomotive Firebox	136
Internal Furnace	25
Water Tube	6
Vertical	18
Air Receivers	5
Heating (steel)	39
Heating (cast iron)	15
Total	266

Condition of boilers inspected—

Good	156
Fair	100
Poor	8
Bad	1
Condemned	1
Total	266

Five special inspections of boilers were made during the year, the owners defraying all expenses incidental thereto as required by Section 16 of the Act.

Fourteen Permits have been issued to owners of plants on production of evidence of their inability to immediately secure the services of qualified engineers.

Two cases of violation of the provisions of Section 6 of the Act were brought to my notice and turned over to the Provincial Police Authorities.

I have no accidents to report in connection with the operation of boilers and engines during the year.

I have the honour to be, Sir,

Your obedient servant,

J. H. MAINWARING,

Boiler Inspector, District No. 8.

EDMONTON, January 21, 1919.

L. C. CHARLESWORTH, Esq.,

Deputy Minister of Public Works,

Edmonton, Alberta.

SIR,—I have the honour to submit to you my annual report as Inspector of Boilers for the year ending December 31st, 1918, in accordance with clause 4, section 17 of The Boilers Act.

As in former years, the early months were devoted to inspection work in and around Edmonton and to the inspection of boilers in the districts west of Edmonton, most of which are accessible by G. T. P. and C. N. Railways.

In addition to the regular monthly examinations for engineers, which have been held in Edmonton on the first Saturday in each month throughout the year, special spring examinations were held at ten outside points during the month of March.

The following summary shows the number of candidates, and classes of certificates recommended:

First Class Certificates	1
Second Class Certificates	7
Third Class Certificates	41
Traction Final Certificates	19
Firemens' Final Certificates	12
Provisional Certificates	101
Renewal of Provisional Certificates	26
Total	207

This shows a considerable falling off in the number of candidates as compared with the previous year, the decrease being most noticeable in the Traction and Provisional class, due probably to poor crops and consequent inactivity of many agricultural engines.

Eleven candidates failed to qualify for the class written for, but were granted certificates of a lower grade, and several applicants were refused examination owing to their inability to produce evidence of having had the necessary experience.

The total number of boiler inspections made by me during the year is 269, and the number of certificates issued 258.

The various types of boilers are enumerated as follows:

Horizontal Tubular	102
Water Tube	23
Locomotive Firebox	51
Vertical	54
Internal Furnace	17
Return Flue	5
Marine	5
Incinerator	1
Cast Iron Sectional	5
Compressed Air Tanks	6
Total	269

Condition in which the foregoing were found:

Good	184
Fair	75
Moderate	8
Poor	2
Total	269

Nine special inspection of boilers were made at the request of the respective owners, all expenses incidental thereto being defrayed by them as required by Section 16 of The Boilers Act, but as most of these inspections were made at considerable distance from headquarters a good deal of time was taken up, and regular inspection work interfered with to some extent.

Under Section 39 of The Boilers Act, 5 Permits were granted to owners of steam boilers, who at the time of their application were unable to secure the services of duly qualified engineers.

I am pleased to be able to report that although the district has not been entirely free from accidents to boilers, these have been for the most part of a minor nature, and no personal injury, or loss of life has been sustained by anyone in the operation of boilers and engines.

I have no cases to report regarding violation of any sections of the Act.

I have the honour to be, Sir,

Your obedient servant,

J. F. GARGILL,

Inspector of Boilers, District No. 9.

ARCHITECTURAL BRANCH

EDMONTON, January 20, 1919.

L. C. CHARLESWORTH, Esq.,
Deputy Minister of Public Works,
Edmonton, Alberta.

SIR,—I have the honour to submit a report on the work of the Architectural Branch of the Department of Public Works for the year 1918.

The work undertaken by this branch during the year 1918 was considerably in excess of that performed during any previous year since 1914. This has been brought about by the construction of various buildings under our own department, and also the increased demand for architectural service to other Government departments. The work carried out for the Education Department has increased enormously in connection with rural school construction; and the services rendered in connection with municipal hospitals for the Department of Municipal Affairs has become a most important part of the service of this branch.

The work of new construction was fairly large considering the period, and consisted of the preparation of designs and the erection of buildings at Ponoka Asylum and Taber, besides various other smaller buildings, all of which are mentioned in detail below.

The maintenance and repair of all provincial buildings continues under the care of this branch, with the exception of gaols and the asylum buildings. This work has been carried out in a most satisfactory manner and at a cost well within the estimate provided for the work, and all the buildings under the care of this branch have been kept in first class condition. This work of maintenance is steadily increasing and to keep pace with the demand a most efficient organization has been built up to carry out the work with expedition and at low cost. The woodworking plant operating in Edmonton is proving a great asset in assisting to keep the maintenance work up to the best possible standard. The plant continues to turn out all the woodwork required for buildings in the Edmonton district, special work for other buildings throughout the Province and also a considerable quantity of special furniture. A detailed summary of the work performed is as follows:

PONOKA ASYLUM.—Plans and specification were prepared with all necessary details for the construction of a Sick and Chronic Ward to accommodate seventy-five male patients. A good deal of special study was given to this matter and the design evolved is, I believe, almost the ideal for the purpose. This is the first of a group of small units which mark a new departure in asylum construction in Western Canada. Tenders were called for the erection of the building and the contract awarded in April to the lowest bidder, Mr. H. G. Macdonald, General Contractor, Edmonton. Construction has been carried out in a satisfactory manner and the building is now approaching completion. Many difficulties had to be contended with on the construction of

this building owing to the difficulty of securing both labour and material, and the building was, unfortunately, shut down for practically one month during the Influenza Epidemic.

Towards the end of the year further plans and specification were prepared and tenders called for on the erection of a Male Dormitory to accommodate one hundred patients and a Dining Hall for two hundred patients, these being further buildings in the group above mentioned. This dormitory building is slightly larger than the first building of the group, but similar in all other respects. The lowest tender received, that of Messrs. Thomas, Jamieson, McKenzie, Ltd., of Calgary, was accepted and the work of construction will be commenced in the early spring. These buildings, it is expected, will be ready for occupation well before the end of the year.

TABER BUILDING.—Plans, specification and necessary details were prepared and tenders called for on the erection of a building at Taber for the accommodation of Court Offices, including a small room for district court purposes, and also providing accommodation for the Provincial Police. This building is of a very simple design, but most pleasing and satisfactory in every way. The contract was awarded to Messrs. Hotson & Depew of Medicine Hat, who submitted the lowest tender. The building is now completed and occupied.

PARLIAMENT BUILDING.—A good deal of alteration work has been carried out in this building owing to a re-distribution of space to the various departments. This work is now practically completed and has resulted in providing improved accommodation to the departments affected, but it is quite evident that some scheme for providing added space for departmental purposes must be undertaken in the very near future. With this in view sketch plans were prepared for a departmental building suitable for erection on the Parliament Building Grounds and these drawings were submitted for your approval. A small amount of new work was performed on the grounds consisting principally of tree planting. The principal undeveloped portions of the grounds were used for garden allotments for members of the Civil Service.

QU'APPELLE BUILDING.—Various sketches were prepared for adaptation of certain buildings in Edmonton to provide office accommodation for Government Departments, and eventually the Qu'Appelle Block, located on McDougall Avenue, directly opposite the Court House, was leased from the owners, Messrs. Brown & Hargraves, on the understanding that the building would be altered and completed in accordance with the requirements of the plans prepared by this branch, and the building is now completed and occupied, providing accommodation for the Returned Soldiers Commission, Vital Statistics Branch, Public Utilities Commission and the Provincial Police. There is also provided in the basement Excise and Customs Stores in connection with the Provincial Liquor Vendor's Branch.

UNIVERSITY OF ALBERTA.—The services of this branch have been demanded in connection with the preparation of drawings and the construction of a horse and cattle barn for the University, and also the erection of a large greenhouse. This work has been carried out and completed in a manner satisfactory to the University authorities.

SCHOOLS OF AGRICULTURE.—Drawings and details were prepared for the erection of blacksmith's shops at the Schools of Agriculture, and the building at Olds was constructed and is now completed ready for use.

MUNICIPAL HOSPITALS.—With a view to getting this work down to a satisfactory basis, I have personally given the matter of hospital planning, especially the small hospitals, a good deal of very serious study, and have also had the privilege of meeting several committees of medical men and graduate nurses and with these discussing the subject. I also visited several of the hospitals now in operation in the Province with a view to obtaining a clearer understanding of the problem involved. As a result of these conferences and study this branch has evolved a number of carefully thought out sketch plans suitable for hospitals in rural municipalities, with accommodation ranging from ten to forty beds. These sketches are now available for use when the policy of the Government as to the construction of these hospitals is definitely fixed.

Complete contract drawings were also prepared for one hospital of ten beds, which it is proposed to erect at Mannville. The Hospital Board called for tenders on its erection and it is anticipated that a contract will be awarded immediately and the construction of this building under the supervision of this branch proceeded with in the early spring. Inspections were made of hospitals at Athabasca, Taber, Cardston and Islay, and the condition and suitability of these buildings reported upon. Drawings were prepared for certain alterations and improvements to the hospital building at Athabasca, a contract awarded and the work carried out under the supervision of this branch.

TUBERCULAR HOSPITAL, BOWNESS.—The Honorable the Minister of Municipalities submitted for my inspection plans of a proposed Tubercular Hospital, which it is intended to erect jointly by the Dominion and Provincial Governments. These plans were carefully gone over and reported upon to the Minister, and as a result, amended plans have been submitted.

RURAL SCHOOLS.—The work of supervision of school building plans exercised by this branch for the Department of Education show a marked increase over that of 1917. The building value represented by plans passed through this branch for 1918 being approximately \$600,000.00, which is about three times the value of the work reported upon during the previous year. A proportion of the projected buildings, however, did not materialize owing to the financial situation. Many of the larger school buildings were constructed in the consolidated districts and are, I believe, giving every satisfaction.

The work of correspondence, interviews and inspection of plans and buildings incidental to the above volume of work has been correspondingly increased. No new plans have been issued, though several are contemplated, together with some improvements to the regulations. In connection with a portion of the work submitted for approval to this branch, which did not materialize, it is unfortunate that some system has not been devised whereby this branch would be informed as to the amount of money which will be available for the construction of the buildings upon which a report is requested. If some such sys-

tem could be devised I feel that a good deal of the unnecessary trouble might be saved, and the district could be informed as to whether or not they are likely to secure the buildings desired for the amount available.

I have the honour to be, Sir,

Your obedient servant,

R. P. BLAKEY,

Provincial Architect.

PROVINCIAL INSTITUTIONS

HOSPITAL FOR THE INSANE.

PONOKA, January, 1919.

THE HON. A. J. McLEAN,
Minister of Public Works,
 Edmonton, Alberta.

SIR,—I have the honour to submit to you the Report for the year ending 1918, being the Eighth Annual Report of the Hospital for the Insane, Ponoka.

On the first day of January, 1918, there were in residence 567 patients, 392 males and 175 females. At the close of the year there were 517 patients, 323 males and 194 females. This apparent decrease in the male patients is due to the transfer of 111 men (including 31 soldiers) to the Hospital for Returned Soldiers, Red Deer. There are still in residence at the latter Institution 105 men (including 28 soldiers) making a total of 428 male patients resident in the two hospitals at the close of the year.

Two imbecile boys, aged 12 and 13½ years respectively, were transferred to the Home for Mentally Defective Children, Edmonton, on December 15th.

The admissions were 142 males and 90 females, a total of 232. The number of patients discharged was 102, as follows:

	Male	Female	Total
Recovered -----	41	34	75
Recovered (Red Deer) -----	2	--	2
Improved -----	3	17	20
Improved (Red Deer) -----	2	--	2
Not Improved -----	1	2	3
Total -----	49	53	102

During the year 46 males (including 4 at Red Deer) and 53 females, a total of 99, were sent out on probation. Of these 1 male and 4 females, classified as improved, were returned to the Hospital.

Three men eloped. Two were returned but the third has not been heard of since.

The recovery rate, based on the total admissions for the year, is, in the case of the males, 30.28 per cent., and in that of the females, 37.77 per cent. The recovery rate, therefore, for both sexes is 33.18 per cent.

The deaths numbered 78, namely: 56 males (including 2 at Red Deer) and 22 females.

The death rate, based on the total number under treatment, is, for the males, 10.48 per cent. and for the females, 8.39 per cent., or for both sexes, 9.76 per cent.

Since the war began 45 soldiers have been admitted with the following results:

	1916	1917	1918	Total
Admitted -----	8	16	21	45
Disch. Recovered -----	1	5	5	11
Disch. Recovered (Red Deer) -----	--	--	1	1
Disch. Improved (Red Deer) -----	--	--	2	2
Died -----	--	1	1	2

About the middle of October the first case of influenza appeared in a female patient who had been admitted a day or two previously. Notwithstanding every precaution the disease became epidemic amongst the patients and staff and 266 cases occurred with a mortality of 31 (20 males, 9 females and 2 attendants). Early in November the epidemic was on the wane and by the middle of the month it was at an end.

The new building for the treatment of acute cases (males) was begun in May and should be completed in March or April next. Many modern principles have been introduced, thereby facilitating the management and treatment of the acutely insane.

In addition to the general upkeep of the buildings the following have been painted: basement of the Administration Building; male and female reception wards; hallway and adjoining rooms of the first floor and hallway of the second floor of the Administration Building; lavatories and vestibules of the first and second floors of the Chronic Male Building.

A greenhouse (50x25 feet), the frame of which was on hand last year, was constructed and has proved useful for growing plants for the wards.

Much work was done in clearing, grading and terracing the grounds in front of the buildings and about half the driveway was seeded in grass.

A root-house (80x28 feet) was constructed and a garage for the Ford truck built.

Two units of the Hinman Milker were installed in the cow barn during the summer and proved so successful over the slower and more unsanitary method of hand-milking that six more units were added.

Owing to the drought, hot dry winds and cutworm, the crops were below the average and with the exception of the green peas and lettuce the vegetable garden was a failure.

It is estimated that 362 acres of the farm are under cultivation; of this acreage 290 were in crop last year, 60 were cleared of brush and broken and 12 were used as hog pasture.

Two quarter sections adjoining the farm were purchased.

The yearly average net cost per capita is \$274.70.

The daily average net cost per capita is 75 cents.

In concluding, we desire to express our indebtedness to the various Departments for their support and assistance.

I have the honour to be, Sir,

Your obedient servant,

E. H. COOKE,

Medical Superintendent.

TABLE No. 1
Showing the number of Admissions, Discharges, and Deaths during 1918.

Month	Admissions			Discharges			Deaths		
	Male	Female	Total	Male	Female	Total	Male	Female	Total

TABLE No. 11

Showing the state of bodily health on admission during 1918.

Bodily Condition	Male	Female	Total
In average bodily health -----	34	15	49
In reduced health -----	103	67	170
In greatly reduced health -----	5	8	13
Total -----	142	90	232

TABLE No. 12

Showing the form of mental disorder in those admitted during 1918.

Form of Disorder	Male	Female	Total
Arterio-pathic Dementia -----	7	1	8
Confusional Insanity -----	2	1	3
Dementia Praecox -----	26	9	35
Epileptic Insanity -----	9	2	11
General Paralysis -----	11	3	14
Imbecility with Epilepsy -----	1	1	2
Imbecility without Epilepsy -----	6	3	9
Manic—Depressive Insanity -----			
Mania, Acute delirious -----	--	1	1
Mania -----	54	42	96
Melancholia -----	23	25	48
Paranoia -----	3	2	5
Total -----	142	90	232

TABLE No 13

Showing number allowed out on probation, and results, in 1918.

Results	Male	Female	Total
Discharged, Recovered -----	39	34	73
Discharged, Recovered (Red Deer) ---	2	--	2
Discharged, Improved -----	2	17	19
Discharged, Improved (Red Deer) -----	2	--	2
Discharged, Not Improved -----	1	2	3
Returned to Hospital -----	2	4	6
Still out at close of year -----	18	31	49

TABLE No. 14

Record of Deaths during 1918.

Reg. No.	Name	Sex	Age	Time in Hospital			Cause of death.
				Years	Months	Days	
1070	Oates, George	M	35	1	--	23	General Paralysis.
1271	McInnes, Neil	M	54	--	2	6	Mitral Regurgitation; cardiac failure.
1126	Gosling, Louisa	F	46	--	10	18	General Paralysis.
1056	L'Huillier, Julius	M	46	1	3	8	General Paralysis.
1211	Drebert, Amalia	F	61	--	7	4	Senile Dementia; Chronic Brain Atrophy.
1321	Hartman, Annie	F	46	--	--	9	Acute Delirious Mania; Exhaustion.
25	Plante, Felix	M	67	--	8	16	Chronic Interstitial Nephritis.
31	Bird, Albert John	M	38	6	8	21	Pulmonary Tuberculosis.
1029	Hill, Duncan	M	19	1	5	25	Pulmonary Tuberculosis.
938	Edwards, James	M	77	2	--	--	Arterio-sclerosis; Gangrene of right foot.
1232	Wootten, Alfred	M	31	--	6	20	Acute Melancholia; Malnutrition; Collapse.
1346	Roth, Catherine	F	45	--	--	8	Acute Mania; Exhaustion.
613	Stromsen, Edwin C.	M	27	3	8	16	Epilepsy; Suffocation.
1341	Schubert, Mary	F	45	--	--	19	Acute Mania; Exhaustion.
673	Hrenuk, Dymter	M	22	3	4	16	Acute Lobar Pneumonia.
764	Petranchuk, John	M	52	2	10	7	Deer
1354	Penner, Erich	M	44	--	1	14 (Re d	Coronary Embolism.
127	Elmira, Margartha	F	68	6	--	7	Acute General Peritonitis.
394	Podlowski, John	M	30	4	8	23	Pulmonary Tuberculosis.
81	Fletcher, Edward D.	M	38	6	10	16	Pulmonary Tuberculosis.
87	Thorp, William Thomas	M	34	6	9	5	Status Epilepticus; Exhaustion.
857	Witwicki, Mary	F	21	2	10	6	Pulmonary Tuberculosis.
1282	Johnston, John	M	49	2	6	8	Pulmonary Tuberculosis.
412	Parker, Alexander	M	39	--	4	17	Pernicious Anaemia.
343	Erickson, Ludwig A.	M	70	4	3	22	General Paralysis.
1169	Nelson, Gustave	M	40	5	--	15	Pulmonary Tuberculosis.
490	Taylor, William	M	60	1	--	2	General Paralysis.
				4	5	2	Huntington's Chorea.

1014	Zimmerman, Christina	F	57	1					21	Chronic Melancholi; Chronic brain atrophy
1391	Desauniers, Peter	M	67	--				9	16	Cerebral Thrombosis; Hemiplegia.
1219	Iyatchya, Harry	M	40	--				10	9	Pulmonary Tuberculosis.
1368	Kellar, James	M	61	--				2	6	Aortic Regurgitation; Cardiac Exhaustion
1142	Robb, Thomas	M	33	1				3	2	General Paralysis.
985	Jones, John B.	M	46	2				1	6	General Paralysis.
1078	Sandholm Axel	M	50	1				8	--	Spinal Caries (Tubercular).
130	Harding, Kate	F	62	7				--	30	Huntington's Chorea.
1186	Tweedle, William	M	71	1				1	20	Cellulitis of neck.
1236	Red Crown, Solomon	M	29	--				11	26	Epilepsy; Acute mania; Exhaustion.
1264	Converse, Stephen	M	46	--				10	16	Epilepsy; Chronic Brain Atrophy.
1447	Greenberg, Sama	F	58	--				--	15	Acute Mania; Exhaustion.
1444	Hale, Anna	F	35	--				--	26	General Paralysis.
1461	Swain, Charles	M	75	--				--	11	Arterio-sclerosis; Syncope.
1465	Spraggs, Edith J.	F	33	--				--	16	Influenza; Broncho-pneumonia.
1464	Clarke, Ada	F	36	--				--	13	Influenza; Broncho-pneumonia.
1343	Chorney, Nestor	M	39	--				7	5	Influenza; Broncho-pneumonia.
1175	Jones, George Wm.	M	16	1				4	27	Epilepsy.
470	Boucon, Marie	F	48	4				--	16	Influenza; Broncho-pneumonia.
538	Malawany, Andrew	M	27	4				7	2	Influenza; Br'o-pneumonia. Haemorrhage.
1084	Denton, Albert	M	73	1				9	11	Influenza; Broncho-pneumonia.
1389	Thomson, Eva Mary	F	32	--				5	2	Influenza; Broncho-pneumonia.
1469	Wuobio, Olga	F	48	--				--	6	Influenza; Broncho-pneumonia.
641	Crook, May	F	21	4				--	29	Influenza; Broncho-pneumonia.
1441	McAllister, Margaret	F	60	--				2	5	Influenza; Broncho-pneumonia.
1438	Charter, Marjorie	F	13	--				2	16	Influenza; Broncho-pneumonia.
90	Pederson, Peter	M	45	7				3	7	Influenza; Broncho-pneumonia.
660	Bort, William	M	37	3				11	18	Influenza; Broncho-pneumonia.
381	Woods, John Wesley	M	30	5				5	11	Influenza; Broncho-pneumonia.
588	Knowles, Ray	M	25	4				4	20	Influenza; Br'o-pneumonia. Haemorrhage
1428	Daggard, Edwin	M	26	4				3	10	Influenza; Broncho-pneumonia.
1390	Poncilius, Gottlieb	M	24	--				5	2	Influenza; Broncho-pneumonia.
563	Rinaldi, Marco	M	37	4				6	--	Influenza; Br'o-pneumonia. Haemorrhage.
103	Sleverson, Oscar	M	31	7				--	4	Influenza; Capillary Bronchitis.
1313	Bredeson, Edwin	M	53	--				8	24	Influenza; Broncho-pneumonia.
84	Strong, Earl	M	26	7				3	9	Influenza; Broncho-pneumonia.
69	Breland, Louis	M	33	7				3	10	Influenza; Broncho-pneumonia.
1240	Rohl, George	M	26	--				7	12	Influenza; Broncho-pneumonia.

TABLE NO. 14—Continued.

Reg. No.	Name	Sex	Age	Time in Hospital			Cause of death.
				Years	Months	Days	
974	Phillon, Rene	M	26	2	5	3	Influenza; Broncho-pneumonia.
185	Cook, George Thomas	M	31	7	2	15	Influenza; Broncho-pneumonia.
1094	Larsen, Nils	M	33	1	10	2	Influenza; Broncho-pneumonia.
761	Dorey, Oscar	M	26	3	6	--	Influenza; Broncho-pneumonia.
312	Tailleur, Josaphat	M	25	6	--	15	Pulmonary Tuberculosis.
17	Lauder, Alex.	M	46	7	3	18	Influenza; Pleurisy.

LETHBRIDGE GAOL

LETHBRIDGE, January 7, 1919.

THE HON. A. J. McLEAN,
Minister of Public Works,
Edmonton, Alberta.

SIR,—I have the honour herewith to submit the Eighth Annual Report of the Provincial Gaol, Lethbridge, along with the usual statistical tables, which are worthy of careful study.

The average prison population for the past year has been 100.57, which is a considerable increase over last year.

It has been a year of severe trial in many ways, especially owing to the continued drought, with hot, dry, strong winds during the summer and the visitation of Influenza during the early winter months.

The general health has been good, and in spite of the prevalence of Influenza we only had one death among all the inmates and staff as a result of it.

While we had less rainfall than usual this year we used more irrigation water on our farm, with the result that we had a satisfactory yield. But without the general application of the irrigation water, our crop would have been a dismal failure.

The securing of satisfactory help continues to be a serious proposition but perhaps with the coming of Peace we may be able to secure men who will take an interest in this class of work.

I thank you for your untiring interest in this Institution and for much valuable advice and assistance during the year.

Also your departmental staff have been uniformly courteous and attentive to all business matters referred to them.

I have the honour to be, Sir,

Your obedient servant,

J. H. RIVERS,
Warden.

FORT SASKATCHEWAN GAOL

FORT SASKATCHEWAN, January 10, 1919.

THE HON. A. J. McLEAN,
Minister of Public Works,
Edmonton, Alberta.

SIR,—I have the honour to submit herewith, the Annual Report of the Fort Saskatchewan Gaol for the year ending December 31, 1918, together with statistics of the gaol population, and the financial report. The daily average population for the past year has been 101.8, an increase on the year 1917 of 22.45, due in part to the transferring of the women prisoners from Macleod to this place.

I greatly regret to have to report the death of one prisoner from the "Spanish Influenza," but if we take into consideration the fact that we had over fifty prisoners down with this disease, we have cause to be thankful that our loss was not larger.

We had six escapes during the year, but I am pleased to say that through the good work of the Provincial Police four of these were re-captured and returned.

Our farming operations for the year were fairly successful, but the heavy frost which struck us in July cut down our potato and wheat crop more than seventy per cent.; but our hay, oat, barley, and vegetable crops were fair, and our root cellars are full at the present time. On the South Farm, we broke twenty-five acres of new land, and cleared forty acres more in readiness for breaking in the Spring.

We were very successful with our hogs this year past, having sold over five thousand dollars' worth of pork, besides that which we consumed in the institution.

Our building operations consisted of a gaol for the women prisoners, at a cost for material of \$3,078.68, the work being done by prison labour, and the heating and plumbing by the boiler room staff. This building is very satisfactory and comfortable, excepting that the work rooms are too small, and I would strongly recommend that a larger room be built on this year.

We also built a steel and concrete coal-bunker, with a capacity of over three hundred tons, at a cost for material of \$1,470.89. This work was also done with prison labour.

You will note that we have again reduced our per capita cost per annum from \$115.63 in 1917 to \$77.83 in the past year, a decrease of 10 cents per capita per diem, this saving being due, of course, not to a decrease in the cost of subsistence and material, but to the increase in revenue, which was very nearly double that of last year.

In conclusion, I beg to thank you for your untiring interest in this institution, and the many courtesies extended to us by yourself

and the members of your staff. I also beg to thank the Provincial Police for their assistance and co-operation during the year, and my own staff for their prompt and faithful services rendered.

I have the honour to be, Sir,

Your obedient servant,

HARRY A. DRIGGS,
Warden.

FORT SASKATCHEWAN, January 23, 1919.

H. A. DRIGGS,

Warden, Provincial Gaol,

Fort Saskatchewan.

SIR,—I beg to draw your attention to the following in connection with work performed by your engineers at the Provincial Gaol during the year 1918.

I may say that during the year 1918 the coal cost an average of one dollar and twenty three cents per ton more than it cost in 1917. While this is true, we have, owing to improvements and changes to the equipment in the engine and boiler rooms, and to changes in the manner of operation of same, been able to operate during 1918 on 542 tons of coal less than we did in 1917.

Coal received during year -----	1,899 tons
Average cost of coal per ton -----	\$4.14

Work performed during the year.

Kilowatt hours produced -----	67,580
Water pumped, treated and filtered -----	7,735,450 gals.
Total hours of light service during year -----	5,590

Your obedient servant,

W. R. ABRAHAM,

Engineer in Charge.

HOSPITAL FOR RETURNED SOLDIERS

RED DEER, January 2, 1919.

THE HONORABLE A. J. McLEAN,
Minister of Public Works,
Edmonton.

SIR,—I have the honor to submit for your consideration the Annual Report for the year 1918, being the First Annual Report for the Hospital for Returned Soldiers, Red Deer. Included are also a number of statistical tables.

On the fourteenth day of March the Hospital was officially opened by yourself, there being thirty-five male patients in residence. At the close of the year the admissions totaled 111.

During the year, there were four probations and two deaths, leaving a total of 105 still resident in the hospital.

The general health of the patients and staff has been very satisfactory, excepting for the epidemic of Influenza, which affected approximately one-third of the staff and patients, but, fortunately, resulted in a mortality of only one patient.

Through the kindly assistance of the Department of Public Works, supplemented by the help of patients and staff, numerous incidental repairs and improvements have been added to the interior of the building, as well as the following without: (a) Airing court for patients; (b) root-house 16 feet by 110 feet; (c) two hundred and forty rods of fencing; (d) planting of three hundred and fifty evergreens; (e) garage and workshop; (f) power line; (g) pruning and cleaning in park coulee; (h) three acres of breaking; (i) terracing of the front embankment, and a considerable amount of boulevarding and grading.

The garden, in spite of the poor condition of the soil and the drouth extending well into the summer, proved to be the best in the vicinity. Details will be found under separate heading.

The future presents much necessary work, but no doubt this will be accomplished in due time.

The yearly cost per capita is \$340.08.

Average net cost per capita per diem, \$1.16.

In concluding, the staff wish to convey their sincere thanks to the various Departments for their support and assistance.

I have the honour to be, Sir,

Your obedient servant,

D. L. DICK, M.D.

Medical Superintendent.

ACCOUNTANT'S BRANCH

EDMONTON, January 2, 1919.

L. C. CHARLESWORTH, ESQ.,
Deputy Minister of Public Works,
 Edmonton, Alberta.

SIR,—As Accountant of the Department of Public Works, I have the honour to submit my report for the year ending December 31st, 1918.

At the outset, I would direct your attention to the fact that, although a comparison of the number of accounts dealt with in 1918 with that in the previous year would indicate that there had been a falling off in the detail work of the Branch, such is not the case. There has been a considerable increase, generally, and also in particular, owing to the Public Institutions having been transferred to the jurisdiction of the Department of Public Works.

The total number of vouchers passed to the Treasury Department for payment during the year was-----	14,723
and, the number of vouchers passed in connection with the Local Improvement Districts Trust Account "A" Funds totalled -----	1,370
giving a total for the year of -----	16,093

This total of 16,093 covered 21,517 accounts and 4,103 pay lists, which were examined and passed for payment by the branch during the year.

A system of accounting had to be devised to take care of the expenditures in connection with the public institutions. This was done, and is working satisfactorily.

The various ledgers, Vote, Roads, Bridges, Ferries and Public Buildings, Construction, Maintenance, and Administration have been duly balanced, and found to be in agreement with the records kept in the Audit Department.

The number of cheques issued from the branch during the year totalled to 5,003, as per details given below:

Drawn on General Revenue Suspense Account-----	422
Issued in connection with Local Improvement Districts, Trust Account "A" Funds -----	4581
Total -----	5003

The amount of moneys received from all sources and deposited with the Provincial Treasurer, was \$275,632.75, while the sum deposited in General Revenue Suspense Account totalled \$28,190.00. Of this latter amount there was transferred to General Revenue, or refunded, \$18,461.68, leaving a Cash Book balance of \$9,708.32, to be carried forward. The major portion of this balance consists of several large amounts, in respect of which a definite disposition was not to hand when the financial year closed.

A comparison of the total amount deposited in General Revenue during the year with that of the previous year, shows an increase of \$164,434.99. This large amount of additional revenue may be explained, in part, by the fees collected under The Mine Owners' Tax Act, \$131,291.73, amount collected for Coal Dealers' Permits, \$3,738.00, and General Revenue derived through the Public Institutions, from the sale of stock, and produce etc., \$39,000.00. Then also owing to the increase of fees collectible under The Boilers Act, the Steam Boilers Branch had a net increase of about \$5,000.00.

The revenue derived from the Surveys Branch, Subdivision Fees, Lease of Road Allowances, etc., shows a decrease.

No amounts were received through the Mines Branch, for the upkeep of the Mine Rescue Stations. Reimbursement of the whole amount of expenditure for 1918, in this connection some \$13,000.00, is to be made by the Workmen's Compensation Board.

The Accounting staff consisted, as in the year 1917, of the Accountant, Assistant Accountant, six clerks, and one messenger.

Respectfully submitted,

TOM. S. S. DAVIES,

Accountant.

CORRESPONDENCE BRANCH.

L. C. CHARLESWORTH, Esq.,
Deputy Minister of Public Works,
 Edmonton, Alta.

SIR,—I have the honor to submit herewith the annual report of the Correspondence Branch of the Public Works Department for the year ending December 31st, 1918.
